# Environmental policy

Be Beazley plc is the parent company of a global specialist insurance business with operations in Europe, Asia, North and South America, and as a responsible business we put environmental, social and governance (ESG) at the heart of our strategy.

We are a proud participant in the Lloyd's market, the largest and oldest insurance market in the world, and as a specialist insurer we are committed to providing our clients with excellent underwriting and claims service worldwide.

We take environmental impact seriously throughout the organisation through top down leadership, and we are striving to deliver the following:

- Reducing the greenhouse gas emissions we generate during our operations, setting targets and reporting progress against these targets, ensuring we use resources and energy more efficiently

- Determining the impact of climate change on our business and investments, in order for us to help stakeholders in understanding the risks it presents

- Considering the environmental impact of the goods and services we procure

- Using our best endeavours to protect the environment, including the prevention of pollution arising from our operations

- Ensuring we meet our compliance obligations in respect to environmental matters as detailed in our legal register

- Encouraging engagement on environmental issues amongst our stakeholders and working to increase awareness of these issues, providing training where necessary to our employees

- Ensuring continual improvement of our environmental management system in order to ensure we enhance our environmental performance

- Communicating the progress of our environmental performance and the development of our environmental management system on a regular basis.

This policy covers all our operations and the physical assets related to those operations which are under our operational control. This policy will be reviewed every two years, or sooner where significant organisational changes occur.

Adrian Cox
Chief Executive Officer
Beazley Group
