## Beazley Quality Indicator Return Premium (QuIRP)

Beazley's QuIRP program is unique in the medical malpractice market. Instead of working from industry-wide quality benchmarks (which frequently conflict with one another), Beazley adopts a tailored approach to the circumstances and needs of each individual client. At the beginning of the policy period, Beazley agrees with the client on a set of target quality improvements. If these targets are met by the end of the policy period, the client will receive a pre-agreed return premium, which may be a substantial sum.

Under the QuIRP program, a client can receive a payment even if it has made a claim during the policy period. No quality measures can guarantee impunity from lawsuits, but through the QuIRP program Beazley seeks to institutionalize procedures that, over time, should reduce claims.
