

# Beautifully designed cyber solutions for a dangerous world

With Beazley's 360° approach, companies have access to a comprehensive set of services, products and solutions, which are beautifully joined together, to protect their business from the dangerous world of cyber risks.

## Coverage

- Breach response – legal, forensics, notification, call center, credit/identity monitoring and crisis management services;
- First party – coverage for business interruption loss and dependent business loss incurred as a result of security breach/system failure, cyber extortion loss, and data recovery costs;
- Liability coverage – data and network liability, regulatory defense and penalties, payment card liabilities and costs and media liability;
- eCrime – fraudulent instruction, funds transfer, telephone fraud.

## BBR Services

- Dedicated in house Breach Response Services unit;
- Experienced experts that have managed thousands of breaches for companies ranging in size from small businesses to large multinationals across a variety of industries;
- 24/7 availability;
- Award winning.

## Claims

- Our claims team partners with our insureds to secure the best possible outcome on claims.
- Beazley has been managing first party and business interruption claims for a decade. We know what's at stake when a business is disrupted.
- Beazley difference – our claims team is collaborative, experienced, accessible, pragmatic, flexible and consistent.

## Risk management

- Beazley owned and managed portal, beazleybreachsolutions.com;
- Resources and education to help plan for incident response and IT security, risk assessment, data privacy and security, and business continuity;
- Interactive online employee training on phishing, ransomware, and other threats; training tip sheets and posters;
- Monthly live webinars, breach trend newsletters, and security alerts on emerging cyber threats, risk management fundamentals, legal and regulatory developments, and best practices.

## Pre-breach services

- Policyholders over \$35m in revenue are eligible for on-boarding calls and incident response plan (IRP) review;
- All policyholders have access to an online on-boarding video, IRP templates, interactive online training, SCORM-compliant training module and discounted anti-phishing services;
- Through Lodestone Security policyholders can access risk and vulnerability assessments, security program design and review, penetrations tests, security awareness training and education and IRP development.

## Lodestone

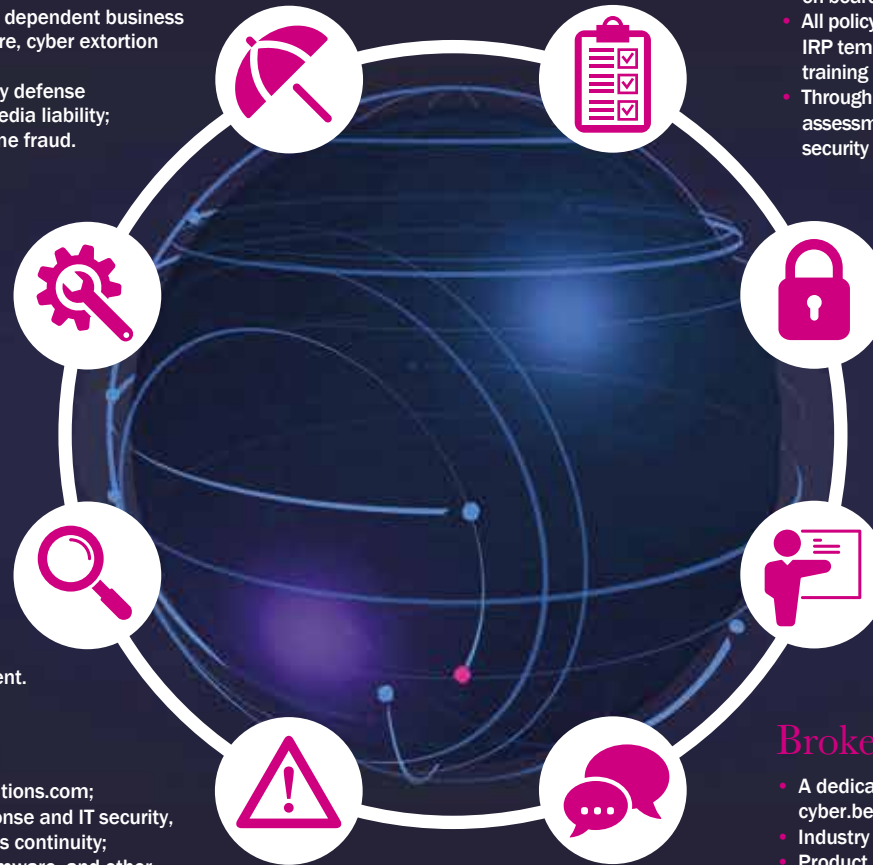

- Wholly owned subsidiary of Beazley plc;
- Provides cyber security consulting services tailored to enhance their clients' cyber defenses;
- High level of expertise and results without big firm pricing;
- Experience in a variety of industries including healthcare, government, military and financial services.

## Workshops

- Policyholders over \$100k premium are eligible for a 4 hour on-site incident response workshop or a business continuity planning on-site workshop;
- Policyholders between \$50k - \$100k are now eligible for either a 2 hour on-site security best practice, disaster recovery/business continuity planning virtual workshop or an incident response virtual table top.

## Broker support

- A dedicated website on cyber risks and key issues to inform and educate, cyber.beazley.com;
- Industry exposures;
- Product resources – claims and breach examples, document center and service providers;
- Training calls, webinars and continuing education events.
