

# Risk Management

Beazley Breach Response (BBR) includes an array of benefits including complimentary loss control and risk management information.

All relevant personnel within your organization will have access to [beazleybreachsolutions.com](http://beazleybreachsolutions.com), a risk management portal that provides educational and loss control information relating to compliance with applicable laws, safeguarding information, preparing to respond to breach incidents and best practices.

Any employee with a need for risk management is welcome to register. Once registered, you will have unlimited access to the following resources on data security, privacy and data breaches:

**Incident response planning:** template incident response plans (IRPs) for various industries, information including a recorded training on developing an effective IRP, and sample table top exercises you can use to test your plan

**Risk assessment:** guidance on risk assessment and risk analysis, the risk assessment process, data classification, and data mapping, as well as recommendations for consideration and implementation

**IT security planning:** discussion of information security frameworks and establishing an information security management program; cybersecurity requirements and threats for industries such as healthcare, financial services, and retail; and practical discussion of best practices for topics like:

- Ransomware
- Email, disk, and device encryption
- Network segmentation
- Cloud computing and vetting cloud providers

**Sample policies and procedures:** security and data privacy policies, including a full range of policies for Health Insurance Portability and Accountability Act (HIPAA) covered entities, as well as information on vendor due diligence and management

**Training:** in addition to the interactive employee training described on the Pre-Breach Services factsheet, we provide industry-specific recorded training for risk managers and materials that can be customized for employee training, including security awareness posters, training slide decks, and employee tip sheets

**Federal and state compliance:** summaries of federal and state breach notification laws, information on new developments in legislation, regulation, and litigation, and resources on legal and cybersecurity requirements for specific industries

**Monthly live webinars:** our webinars focus on developing cyber threats, practical discussion of risk management fundamentals, and legal and regulatory developments. Recent topics have included:

- Cloud cybersecurity
- Digital Identities: The Currency of the Dark Web
- What healthcare organizations should be learning from recent Office for Civil Rights (OCR) enforcement
- What the New York State Department of Financial Services (NYDFS) cybersecurity regulation means for financial institutions
- How to set up authentication that works

**Breach trends newsletters and security alerts:** With hundreds of incidents reported to BBR Services each month, our monthly breach trends and periodic security alerts give our policyholders the benefits of the developing threats we see and educate them about steps they can take to protect their organizations. Here are a few examples of recent alerts:

- Responding when your vendor has experienced a breach
- New phishing attack targets employee direct deposit instructions
- W-2 fraud and out-of-band authentication

## Information Security Incident Response Guide

Beazley, in partnership with Navigant, a leader in complex data management and forensics analysis, developed a joint Information Security Incident Response Guide aimed at providing a roadmap for your organization to prepare for and manage the aftermath of a data security breach.

The Information Security Incident Response Guide covers the common containment tasks, investigative questions, and sources of evidence for eleven different types of data security incidents, including:

- Ransomware and other malware
- Network intrusions and unauthorized network access
- Lost or stolen devices
- Point of sale compromises and ATM skimming
- Business email compromise, tax fraud, and other social engineering

The Guide is an invaluable resource for every member of your incident response team to help you best position your organization for an effective forensic investigation.
