

Pre-Breach Services

Beazley recognizes that preparing for and preventing breaches have become inseparable from insuring a cyber loss.

In addition to the resources we offer through our risk management portal, beazleybreachsolutions.com, Beazley MediaTech policyholders also have access to a full suite of pre-breach services.

Pre-breach services from Lodestone Security

Beazley policyholders enjoy negotiated rates for pre-breach services from Lodestone Security. Lodestone is a wholly owned subsidiary of Beazley plc that was created to provide cybersecurity consulting services tailored to the small and mid-sized business (SMB) market, because you shouldn't have to be a Fortune 500 company to afford rigorous cybersecurity. Services include:

- Risk assessments
- Security awareness training and education including phishing exercises
- Security program design and review
- Virtual CISO
- Vulnerability assessments
- Penetration tests
- Application security reviews including web, mobile and Internet of Things
- Policy and procedure review and development
- Incident response plan development.

Onboarding

All Beazley policyholders are eligible for onboarding to help you understand and get the most from your policy and how to work with the BBR Services team. At your request, a team member will have a 45- to 60-minute call with stakeholders at your organization, to explain how BBR Services works with you in the event of an actual or suspected breach and to answer questions you may have. We also provide an onboarding video on our risk management portal that you should review before the call.

Incident response plan (IRP) review

At your request, BBR Services will review your IRP and provide feedback, based on our experience handling thousands of breaches, to make sure you get the benefits of your policy and are able to manage the breach as efficiently as possible. You also have access to template IRPs for various industries on our risk management portal.

Interactive online training

All policyholders have access to interactive online training for employees as part of their BBR policy. Our online training site, elearning.beazleybreachsolutions.com, includes the following interactive training modules:

- Phishing prevention
- Malware protection
- Mobile device security
- Wi-Fi practices
- Identity theft prevention
- Smarter, better passwords
- Smarter, better email
- Spam prevention.

Policyholders can upload a list of employees, create training assignments for their employees, and track individual completion of training.

For policyholders with their own learning management systems, we also provide a SCORM-compliant training module they can deploy on their own site. The 45-minute course covers what's at risk; how to protect your information; when things go wrong; how to avoid common scams, mobile threats, and social media risks.

Anti-phishing

Phishing continues to be one of the greatest risks we see for organizations, and one where employees pose the greatest vulnerability. One effective way insureds can help reduce risk is to periodically test employees through phishing campaigns, monitor the effect on response rates, and train employees who don't show improvement. BBR policyholders enjoy a 25% discount on anti-phishing training and services from KnowBe4, a premier provider of anti-phishing training tools.

The descriptions contained in this communication are for preliminary informational purposes only. The product will be available on an admitted basis beginning June 26, 2019 in some, but not all US jurisdictions through Beazley Insurance Company, Inc., located at 30 Batterson Park Road Farmington, CT 06032, and is currently available on a surplus lines basis through licensed surplus lines brokers underwritten by Beazley syndicates at Lloyd's. The exact coverage afforded by the product described herein is subject to and governed by the terms and conditions of each policy issued. The publication and delivery of the information contained herein is not intended as a solicitation for the purchase of insurance on any US risk.
