

Beazley strengthens Bermuda presence with Head of Alternative Risk Transfer and new office location

June 01, 2026

Beazley, the leading specialty insurer, today announces that Stefan Wunderlich has been appointed Head of Alternative Risk Transfer (ART) alongside his existing role of Head of Parametric and will be relocating to Bermuda subject to immigration approval.

Beazley's commitment to Bermuda has been further strengthened by the confirmation of its new office location at Ninety-One, 91 Front Street, which will open in June 2027. This builds on its continued investment in the island as its strategic hub for complex and specialty solutions - including ART, Mortgage Indemnity Insurance and Property Treaty Reinsurance.

Paul Bantick, Group Chief Underwriting Officer, said: "We are moving at pace to build out our presence in Bermuda. We have a growing team on the ground, are already successfully underwriting Property Treaty and the deployment of Stefan's expertise will see a step change in our ART offering, which includes parametrics. It's exciting to be part of Bermuda's innovative insurance community and have the opportunity to better support our brokers and clients manage complex risks."

Beazley's office lease was secured through Brookfield Asset Management.
