10 Years of Beazley Safeguard: Protecting your people, reputation and future

November 18, 2024

The value of Safeguard in an era of complex risk

Sexual abuse has a profound impact on survivors, and organisations. Safeguard isn't just insurance – it's a commitment to creating safer environments and supporting those affected. Here is how we can support:

Creating a safer environment:

We help clients develop robust policies and procedures to create safer spaces for minors, vulnerable adults, those supporting them and your wider organisation. By focusing on prevention, we aim to reduce the emotional and physical toll on individuals, while also protecting your organisation's reputation and financial stability. Through our risk mitigation provider Praesidium, your clients will have peace of mind knowing they're taking concrete steps to create a safer space for everyone.

Access to unparalleled expertise you can trust:

Navigate complex and challenging situations with confidence and support. With over 10 years of experience in offering standalone sexual abuse coverage, our dedicated underwriters and claims teams are here to guide clients through every step with compassion and expertise. You and your clients don't need to be an expert in handling these sensitive situations. We've got you covered with expert claims professionals, access to top risk mitigation partners, like Praesidium, and a network of specialized attorneys. – you have a whole team of professionals ready to help you, your employees and customers.

Maintaining financial stability with comprehensive coverage:

By buying standalone coverage via Safeguard, businesses won’t deplete their general liability insurance on sexual abuse claims. This dedicated coverage ensures organisations remain fully protected across all areas of their business, even if faced with a sexual abuse case. We understand the unique challenges of sexual abuse cases and we offer coverage that fills the gaps often found in general liability policies. Confidently manage risks without compromising financial stability.

Tailored solutions for complex situations:

Comprehensive protection that evolves with your needs. Every organisation is unique, and so are the risks. With additional coverage options like third-party on third-party coverage, including child on child and/or patient on patient, and support for negligent hiring or retention allegations, Safeguard supports you in mitigating the risk. For healthcare providers, Safeguard+ also offers even more tailored protection for industry specific needs.

With Safeguard, you’re not just buying a policy; you’re gaining a partner who understands the sensitivity and complexity of these issues. Let us help you protect what matters most – your colleagues and customers, your reputation and your future.
