Strategic report of the managing agent

Overview

The balanced portfolio of Syndicate 623 (the 'syndicate') continues to underpin its underwriting performance in recent years. The syndicate writes business in parallel with Syndicate 2623. For the 2024 underwriting year and beyond, business written domestically by Beazley's US-based underwriters in prior years is no longer written through Syndicate 623. At the same time, the syndicate's portfolio was rebalanced to cover a larger share of Beazley's existing wholesale business written in London, Europe, and Singapore, with Syndicate 623 taking a larger share of risks that are written in parallel with Syndicate 2623.

The capacities of the syndicates managed by Beazley Furlonge Limited ('BFL') are as follows:

| | 2025 Year of Account £ m | 2024 Year of Account £ m |
|--------------|-----------------------------|-----------------------------|
| 623 | 861.0 | 887.2 |
| 2623 | 2,357.1 | 2,299.6 |
| 3622 | 35.5 | 37.0 |
| 3623 | 432.0 | 1,325.6 |
| 4321 | — | — |
| 5623 | 419.3 | 396.6 |
| 6107 | 43.9 | 57.8 |
| Total | 4,148.8 | 5,003.8 |

The result for Syndicate 623 for the year ended 31 December 2025 is a profit of \$156.4m (2024: \$122.4m). Included from page 6 is an overview of the performance of the syndicate's four main underwriting divisions: Cyber Risks, Marine, Accident and Political (MAP) Risks, Property Risks and Specialty Risks. The remaining \$5.4m (2024: \$6.1m) of Gross Written Premium, and \$6.4m of loss (2024: \$2.5m of profit) relates to Beazley Digital.

Year of account results

The 2023 year of account ('YoA') has closed with a return on capacity of 14.4%. This strong return on capacity is a result of careful risk selection and a relatively favourable natural catastrophe experience for the year of account. The 2024 YoA is currently forecasting a 7.5% return on capacity. The 2025 YoA is currently projected to close with a positive return on capacity. This YoA is still developing. Catastrophe events throughout 2026 and the development of 2025 calendar year losses may still impact the 2025 YoA.

Rating environment

Rate movements for the syndicate softened in 2025, with an overall decrease of 2.9% in 2025 across the portfolio (2024: 0.2% increase). Cyber Risks recorded the largest reduction at 5.8% (2024: 4.4% decrease). Property Risks also saw rate reductions of 4.6% (2024: 1.8% increase), while MAP Risks experienced rate decreases of 1.1% (2024: MAP 1.1% increase). Specialty Risks remained comparatively stable, with a modest rate decrease of 0.5% (2024: 0.3% increase).

The syndicate's gross written premiums for 2025 are \$1,033.9m (2024: \$1,048.7m). This reflects a 1.4% decrease, driven primarily by the 2.9% rate reduction mentioned above. This is partially offset by stamp capacity increases between the 2023 and 2024 YoA. Net earned premiums for 2025 are \$875.2m (2024: \$844.9m).

Combined ratio

The combined ratio ('COR') is a measure of operating performance and represents the ratio of the syndicate's total costs (excluding foreign exchange movements) to total net earned premium. The syndicate's COR has decreased in 2025 to 90.7% (2024: 93.9%) driven by improvements in both the claims and expense ratio.

Claims

The claims ratio is a measure of the syndicate's claims experience and represents the ratio of net insurance claims to net earned premium. The claims ratio decreased to 47.6% in 2025 (2024: 48.8%). The claims ratio improvement was primarily driven by lower catastrophe losses during the year, including California wildfires in early 2025 and Hurricane Melissa in late 2025. In addition, current accident year attritional claims experience was more favourable in 2025. These benefits were partially offset by more modest prior year reserve releases compared with 2024. In 2025, the positive releases were present in the Property segment, which continues to grow as a proportion of total syndicate business, with strengthening present on the Specialty segment.

Prior year reserve development

During 2025 the syndicate released prior year reserves of \$5.4m (2024: \$26.4m). The syndicate's release was driven by its Cyber and Property Risk divisions, reflective of favourable catastrophe experience, largely being offset by strengthening on the Specialty Risks book. Net (releases)/strengthening are shown by division in the table below:

| | 2025 | 2024 |
|-----------------|--------------|---------------|
| | \$m | \$m |
| Cyber Risks | (5.9) | (8.8) |
| Digital | 0.3 | (5.7) |
| MAP Risks | 1.2 | 13.6 |
| Property Risks | (21.9) | (26.8) |
| Specialty Risks | 20.9 | 1.3 |
| Total | (5.4) | (26.4) |

Net operating expenses

Net operating expenses, including business acquisition costs and administrative expenses, remains broadly flat decreasing slightly from \$380.9m in 2024 to \$377.6m in 2025. The breakdown of these costs is shown below:

| | 2025 | 2024 |
|----------------------------------------------|--------------|--------------|
| | \$m | \$m |
| Brokerage costs | 218.1 | 223.7 |
| Other acquisition costs | 33.1 | 27.1 |
| Total acquisition costs | 251.2 | 250.8 |
| Administrative and other expenses | 101.2 | 102.4 |
| Profit commissions payable to managing agent | 25.2 | 27.7 |
| Net operating expenses¹ | 377.6 | 380.9 |

1 A further breakdown of net operating expenses can be seen in note 4.

Brokerage costs as a percentage of net earned premium are approximately 24.9% (2024: 26.5%). Brokerage costs are deferred and expensed over the life of the associated premiums in accordance with accounting guidelines. Other acquisition costs comprise costs that have been identified as being directly related to underwriting activity (e.g. underwriters' salaries and Lloyd's box rental). These costs are also deferred in line with premium earning patterns. Administrative expenses comprise primarily of IT costs, staff costs, facilities costs, Lloyd's central costs and other support costs.

The expense ratio is a measure of net operating expenses to net earned premium. The expense ratio for 2025 is 43.1% (2024: 45.1%). The lower expense ratio reflects a change of business mix to lower brokerage business and higher net earned premium compared to prior year. The managing agent continues to focus on total expense base, allowing for additional expenses where aligned to underlying business growth or to enhance the syndicate's business model.

Strategic report of the managing agent continued

Investment performance

The syndicate's investments generated a return of \$76.8m, or 5.4% in 2025 (2024: a return of \$71.5m, or 5.3%). Financial assets were \$1,456.4m as at 31 December 2025 (2024: \$1,405.8m). Returns were driven by strong performance from credit and equity holdings, and from the decline in treasury yields on fixed income assets.

The macroeconomic backdrop proved resilient. Despite an uptick in market volatility earlier in the year and a backdrop of elevated geopolitical risk, the US economy performed well supported by investment and consumption growth. The Federal Reserve cut rates by 0.75% over the year which created a favourable backdrop for short dated fixed income, while long dated bond yields saw smaller declines which resulted a steepening of the overall yield curve. Despite ongoing macro uncertainty, resilient corporate fundamentals supported investment performance in 2025, with exposure to investment grade corporate bonds benefiting from tightening credit spreads. Holdings in collateralised loan obligations also performed well, offering incremental credit spread in well diversified and high quality structures.

The portfolio benefited from its exposures to equity markets. Following a weak start in Q1, equities recovered well led by corporate earnings growth and supportive monetary policy. We added regional diversification to our equity holdings early in the year, which are now more closely aligned to global indices. Exposure to high yield added value as spreads held modest gains through the year. Hedge funds, which offer an additional diversified source of return, also generated positive excess returns.

The yield of the fixed income portfolio at 31 December 2025 was 3.8% for 623 with a duration of 1.7 years. This level of yield is a positive starting point for fixed income investment returns. The syndicate's investment portfolio remains diversified and well positioned for a range of market outcomes.

The table below details the breakdown of our portfolio by asset class:

| | 31 Dec 2025 | | 31 Dec 2024 | |
|---------------------------------------------------------------------|------------------|-------------|------------------|-------------|
| | \$'000 | % | \$'000 | % |
| Shares and other variable yield securities and units in unit trusts | 278,013 | 19.1 | 242,717 | 17.3 |
| Debt securities and other fixed income securities | 1,034,083 | 71.0 | 1,033,543 | 73.5 |
| Participation in investment pools | 13,234 | 0.9 | 13,349 | 0.9 |
| Loans and deposits with credit institutions | 6,556 | 0.5 | — | — |
| Derivative assets | 45 | — | 1,955 | 0.1 |
| Syndicate loans to central fund | — | — | 5,864 | 0.4 |
| Other investments | 70,652 | 4.9 | 67,440 | 4.8 |
| Financial assets at fair value | 1,402,583 | 96.4 | 1,364,868 | 97.0 |
| Cash at bank and in hand | 53,844 | 3.6 | 40,887 | 3.0 |
| Total | 1,456,427 | 100 | 1,405,755 | 100 |

Reinsurance

In 2025, the amount spent on outward reinsurance was \$153.9m (2024: \$175.2m). As a percentage of gross premiums written, it decreased in 2025 to 14.9% from 16.7% in 2024. The reduction is driven by the Cyber book, with 2024 seeing the purchase of multi-year Cyber catastrophe bonds, covering future years of account. Note, as a percentage of earned premiums, the reduction is more consistent with a ratio of 16.0% (2024: 16.8%).

Outlook

The 2024 underwriting year was impacted by losses from the Atlantic hurricanes (Milton & Helene), as well as the California wildfires in early 2025. This YoA achieved a mix of rate changes across its diverse book. MAP Risks and Property Risks demonstrated rate increases which were partially offset by a softening of the rates on the Cyber Risks book in 2024. The syndicate is expected to produce a 7.5% return on capacity.

In 2025, the syndicate's written business has decreased, in comparison to the 2024 YoA, as a result changes in stamp capacity splits. Underlying growth across 623 and 2623 has been offset by further rate reductions to those noted above. The 2025 YoA has experienced some claims events - most notably the California wildfires. Despite this, and recognising that the year remains at an early stage of development, the 2025 YoA is expected to generate a positive return on capacity. The managing agent will continue to closely monitor it's development.

Looking ahead to 2026, the managing agent expects market conditions to become more competitive against a backdrop of heightened and evolving risks. This will place a greater emphasis on disciplined risk selection, cycle management and stakeholder relationships to deliver positive returns. The managing agent continues to search for growth opportunities while taking heed of the increasingly complex macroeconomic environment. In parallel, the managing agent's expertise and focus on innovation will allow it to navigate the rate cycle and execute its underwriting strategy.

In 2026 the managing agent will facilitate a mandatory offer by Beazley Underwriting Limited for all capacity on the Syndicate not owned by Beazley Underwriting Limited or other Beazley Group companies.

Divisional performance commentary

Cyber Risks

| | 2025 | 2024 |
|-------------------------------------|-------------|-------------|
| | \$m | \$m |
| Gross premiums written | 135.1 | 141.5 |
| Net premiums written | 107.9 | 89.1 |
| Earned premiums, net of reinsurance | 101.3 | 123.2 |
| Claims incurred, net of reinsurance | (46.1) | (61.7) |
| Net operating expenses | (44.5) | (50.3) |
| Technical result | 10.7 | 11.2 |
| Claims ratio | 46% | 50% |
| Expense ratio | 44% | 41% |
| Combined ratio | 90% | 91% |
| Renewal rate change | (6)% | (4)% |

Cyber Risks gross premium decreased in 2025 to \$135.1m (2024: \$141.5m). Softening rating conditions are not an indication that cyber threats are relenting. The many high-profile incidents across the retail and manufacturing sectors during the year attest to this. In this challenging risk and rating environment we maintain a disciplined, vigilant approach to our underwriting. Beazley utilises active risk selection and an absolute determination to achieve rate adequacy in every individual risk we take on. At the same time we're carefully managing accumulation risk and, as the managing agent, participate in the Beazley group's \$1bn reinsurance programme that includes insurance linked securities and traditional reinsurance.

The impact of such underwriting, has seen an improvement in 2025's combined ratio of 90% (2024: 91%).

Looking ahead, we see no let-up in demand for comprehensive cyber protection as weak cyber insurance penetration, underinsurance and lack of resilience all remain a challenge our market needs to address.

MAP Risks

| | 2025 | 2024 |
|-------------------------------------|-------------|------------|
| | \$m | \$m |
| Gross premiums written | 234.3 | 240.0 |
| Net premiums written | 213.2 | 219.9 |
| Earned premiums, net of reinsurance | 207.1 | 182.2 |
| Claims incurred, net of reinsurance | (91.2) | (95.5) |
| Net operating expenses | (89.7) | (85.9) |
| Technical result | 26.2 | 0.8 |
| Claims ratio | 44% | 52% |
| Expense ratio | 43% | 47% |
| Combined ratio | 87% | 99% |
| Renewal rate change | (1%) | 1% |

2025 saw MAP Risks volumes remain broadly flat with gross premiums written of \$234.3m (2024: \$240.0m). Whilst 2025 was a year marked by geopolitical turbulence and shifting trade dynamics, MAP has stood firm – leveraging deep expertise, disciplined underwriting and strategic agility, and achieving a combined ratio of 87% (2024: 99%). Within the improved combined ratio, are strong prior year reserve releases on the War, Cargo and Political classes.

The marine market is facing the double pressure of excess capacity and altered trading patterns, and this is particularly true of the marine war market. As a market leader we are focused on supporting our clients with cover to manage the trade challenge, whilst we continue our laser-like focus on rate adequacy.

Transition underwriting is a key topic across Beazley and in marine underwriting. We are working to ensure our underwriting and risk management advice for the shipping industry offers the right support to manage the additional risks that come with moving to alternative fuels.

Renewables are a strategic priority, and we have expanded our underwriting footprint with new hires in London and Singapore. During 2025 we supported the Sustainable Markets Initiative in its efforts to look at how insurance can support the commercial implementation of fusion energy projects, and we are hopeful that 2026 will see the first successful test of a commercial nuclear fusion facility.

Looking ahead we see ongoing geopolitical change bringing continued demand for our specialist product suite. And in transition underwriting, a significant opportunity to drive growth by working across the division and the company as a whole.

Divisional performance commentary continued

Property Risks

| | 2025 | 2024 |
|-------------------------------------|-------------|-------------|
| | \$m | \$m |
| Gross premiums written | 361.8 | 336.8 |
| Net premiums written | 279.7 | 265.5 |
| Earned premiums, net of reinsurance | 272.1 | 254.5 |
| Claims incurred, net of reinsurance | (89.2) | (97.0) |
| Net operating expenses | (118.4) | (103.1) |
| Technical result | 64.5 | 54.4 |
| Claims ratio | 33% | 38% |
| Expense ratio | 44% | 41% |
| Combined ratio | 77% | 79% |
| Renewal rate change | (5)% | 2% |

Property Risks had a successful year achieving gross premium written of \$361.8m rising from \$336.8m the previous year. Whilst the rate increases of the past three years eased in 2025, signalling a more moderate pricing environment, our strong foundations of robust technical pricing and rate adequacy continue to provide an effective baseline from which we were able to continue to grow premiums. This more normalised pricing environment is reflected in our combined ratio of 77% (2024 79%).

We continue to see ongoing long-term growth opportunities as property is evolving into an increasingly specialist class of insurance. This is where we excel, bringing our expertise as a specialist insurer.

January's terrible Californian wildfires and July's floods in Texas highlighted that climate-related risk is not going away, and the impact of sudden natural disasters remains as destructive as ever. Added to this, inflation is driving up the costs and complexities of rebuilding, with property values, materials and labour all climbing in price.

Looking ahead to 2026, the property rating environment is competitive but adequate. Climate risk and rising property values, however, mean maintaining rate adequacy is essential, and property must remain a specialist class underwritten with precision.

Specialty Risks

| | 2025 | 2024 |
|-------------------------------------|---------------|---------------|
| | \$m | \$m |
| Gross premiums written | 297.3 | 324.3 |
| Net premiums written | 273.8 | 294.3 |
| Earned premiums, net of reinsurance | 289.0 | 269.2 |
| Claims incurred, net of reinsurance | (186.8) | (156.2) |
| Net operating expenses | (118.1) | (130.5) |
| Technical result | (15.9) | (17.5) |
| Claims ratio | 65% | 58% |
| Expense ratio | 41% | 48% |
| Combined ratio | 106% | 106% |
| Renewal rate change | (0.5)% | 0.3% |

Overall the division experienced a decrease of gross premiums written to \$297.3m (2024 \$324.3m). The combined ratio, whilst benefitting from an improved expense ratio, has seen prior year strengthening across its D&O, Healthcare and Hospital classes, resulting in a combined ratio of 106% (2024: 106%).

Capital markets activity remained in flux during 2025. This led to our highly specialist M&A team experiencing a later than expected surge in business through the second and third quarters, as investors began to move forward with long-postponed transactions.

We continue to respond to market uncertainty with agility, offering higher limits and more capacity through consortia arrangements. As well as delivering cross-class solutions through our flex product, combining our cyber and financial lines to meet the specialist needs of our clients. We see the potential for long-term growth in both areas.

General Liability has long been a class we've considered too commoditised to be a core part of our underwriting strategy. Yet it is seeing some areas of businesses shifting into the specialist realm, opening up growth opportunities where we can successfully deploy our specialist underwriting approach.

Our focus remains on staying ahead of the evolving risk environment – including an increasingly litigious environment for boardrooms and innovating where new risk areas are emerging.

Managing agent's report

The managing agent presents its report for the year ended 31 December 2025.

This annual report is prepared using the annual basis of accounting as required by Statutory Instrument No 1950 of 2008, the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 and applicable United Kingdom Accounting Standards, including Financial Reporting Standard 102: The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland and Financial Reporting Standard 103: Insurance Contracts.

Principal activity

The principal activity of the syndicate is the transaction of a range of specialised insurance business at Lloyd's, including the underwriting of professional indemnity, cyber liability, property, marine, reinsurance, accident and health, political risks and contingency business.

Business review

A review of the syndicate's activities and future outlook is included in the strategic report.

Risk governance and reporting

BFL's Board of Directors (the 'Board') has the responsibility for defining and monitoring the risk appetite within which BFL and the syndicates operate (collectively, 'Beazley'), with key individuals and committees accountable for day-to-day management of risks and controls. Regular reporting from the Risk Function to Board and Risk Committee meetings and senior management committees ensures that risks are monitored and managed as they arise. Beazley Group is structured across three platforms, one of which is the London Wholesale platform governed by BFL on behalf of the syndicates. This platform-focused structure strengthens leadership accountability, enhances platform-level and legal entity governance, and further reinforces the effectiveness of the overall risk management framework.

Climate-related risks and opportunities

Climate-related risks, opportunities, and other sustainability related matters were regular agenda items throughout 2025 led by Beazley plc's Board and supported by the boards of BFL and the Group's other regulated subsidiaries. The Group's sustainability strategy sets out the goals and targets across a wider range of sustainability issues, including climate change. Beazley plc's consolidated annual report and accounts includes the Group's disclosures for the Task Force on Climate-Related Financial Disclosures Recommendations. The 2025 Beazley plc annual report and accounts is expected to be published on the Group's website in March 2026.

Although not specifically listed in the risk categories detailed further in this report, the Board of BFL deems climate risk to be inherently embedded within all risks managed across the syndicate.

Risk management

The Board maintains a sound understanding of all drivers of risk and, supported by the Risk Function, provides effective challenge to management in overseeing risks across Beazley. The Board and the Risk Committee continue to ensure that the risk management framework remains aligned to Beazley's evolving risk profile, supports robust oversight and challenge, and embeds a strong risk culture across the business.

The Board remains attentive to emerging risks and developments in the regulatory and legal landscape. The Risk Function continues to engage in key strategic projects, providing proportionate and effective second-line challenge to support the ongoing evolution of the risk management framework.

The effectiveness of risk management across the business is underpinned by continued collaboration between Beazley's assurance functions, in particular Compliance, Risk Function and, Control and Compliance Assurance Team (CCAT), to deliver a coherent second line oversight function.

Throughout the year, Beazley strengthened its risk leadership team and further matured its risk culture across the Group. Investment in both the first and second lines of defence has progressed through the phased delivery of modernisation and transformation programmes, to enhance oversight, agility and overall risk management capability.

Risk management oversight and framework

The Board has ultimate responsibility for risk management and delegates direct oversight of the risk management framework to its Risk Committee. The Board delegates executive oversight of the Risk Function and framework to the BFL Management Committee, which fulfils this responsibility in conjunction with the Group Risk and Regulatory Committee.

The risk management framework sets out the approach to identifying, assessing, managing, monitoring, and reporting principal risks. This framework underpins the delivery of the Group's strategic priorities and supports informed decision making at all levels.

Beazley operates a governance structure founded on the 'three lines of defence' model, with the Risk Function forming part of the second line of defence. Ongoing communication and collaboration across the three lines of defence ensures that Beazley identifies and manages risks effectively.

The Board approves Beazley's risk appetite statements annually and receives regular updates throughout the year on performance against these appetites, including impact on the risk profile of the business.

A comprehensive suite of reports from the Risk Function supports senior management and the Board in fulfilling their oversight responsibilities. These reports include updates on risk culture, risk appetite, risk profiles, stress and scenario testing (including reverse stress testing) and analysis, emerging and heightened risks, and the Own Risk and Solvency Assessment (ORSA). In addition, the Risk Function provides reporting to the Remuneration Committee to ensure alignment between risk considerations and remuneration practices.

An annual risk management plan is developed, with reference to Beazley's business strategy, external market and regulatory developments, as well as Beazley's risk profile. In addition, the Risk Function integrates insights from internal audit findings and other assurance activities into its risk assessment and planning processes to ensure a comprehensive and forward-looking approach.

The approach to identifying, managing and mitigating emerging risks includes inputs from across the business, analysis of lessons learned following incidents and industry thought leadership. The approach considers the potential materiality and likelihood of impacts, which helps prioritise emerging risks that Beazley monitors or undertakes focused work on. Key emerging risks in 2025 included: Artificial Intelligence (AI); Geopolitical and conflict escalation; Supply chain complexity; and Political and social unrest/instability.

Principal risks

Beazley operates in a dynamic environment where risk exposures evolve in response to changes in market conditions, regulatory developments, and strategic priorities. Identifying and managing these risks is fundamental to safeguarding Beazley's financial strength and delivering sustainable value to stakeholders.

Principal risks are subject to regular review through Beazley's risk and control assessment process. The overall risk profile is continuously monitored with emphasis on operational and regulatory risks, to ensure that our control environment and risk management capabilities evolve in line with business change and developments in the external environment.

The table below summarises the principal risks faced by Beazley, together with the governance, oversight and control measures in place to mitigate these exposures, and the associated outlook.

Legend for principal risks table below

Risk outlook

△ Increasing

◇ Stable

| <p>Insurance</p> <p>Risk of loss arising from uncertainties and deviations in the occurrence, frequency, amount and timing of insurance premium and claim liabilities relative to the assumptions at the time of underwriting. This includes key underwriting risk drivers such as market cycle, catastrophe, reinsurance reserves and climate.</p> <ul style="list-style-type: none"> • Market cycle: potential systematic mispricing of medium- or long-tailed business that does not support revenue to invest and cover future claims; • Catastrophe: one or more large events caused by nature (e.g. hurricane, windstorm, earthquake and/or wildfire) or mankind (e.g. systemic cyber-event, global pandemic, losses linked to an economic crisis, an act of terrorism or an act of war and/or a political event) impacting a number of policies, and therefore giving rise to multiple losses; • Reinsurance arrangements: reinsurance may not be available or purchases do not support the business underwritten (e.g. mismatch); • Reserving: reserves may not be sufficiently established to reflect the ultimate paid losses; and • Climate risk: impact of climate change on underwriting and reserving assumptions, including the risk arising from the physical effects of climate change, the transition to a low-carbon economy and associated litigation risks. | <p>Insurance risk, arising in the syndicates, is principally managed by Beazley through pricing tools, analysis of macro trends and claim frequency/severity, which ensures exposure is well diversified and not overly concentrated in any one area, or line of business.</p> <p>Our strategic approach to exposure management and a comprehensive internal and external reinsurance programme help to reduce volatility of profits in addition to managing net exposure through the transfer of risk.</p> <p>Our prudent and comprehensive approach to reserving ensures adequate provisions are made for the payment of all valid claims. High calibre claims and underwriting professionals deliver expert service and claims handling to insureds, ensuring good customer outcomes.</p> <p>Beazley carries out periodic analysis to identify significant areas of concentration risk across its business and monitors solvency regularly to ensure adequate capitalisation.</p> <p>Beazley continuously monitors key trends and incidents, particularly for evolving perils such as cyber, to ensure our view of risk is up-to-date.</p> <p>Beazley makes extensive use of modelling, including catastrophe modelling, the use of our Solvency II model and stress and scenario testing to ensure insurance risk is within approved risk appetite.</p> <p>Beazley integrates management of climate risk into its business processes for physical and litigation risk, through climate-adjusted pricing, capital modelling and climate conditioned views of risk for its most sensitive perils and supporting underwriting using targeted tools and dashboards and scenario analysis. The approaches continue to develop, given the evolving nature of climate risk.</p> <p>Investment in underwriting, reinsurance, and exposure management systems and processes continue to strengthen our risk management capabilities in an increasingly complex landscape shaped by advances in artificial intelligence, rising geopolitical tensions, and climate-related natural hazards.</p> <p>Outlook: While we continue to assess Beazley's insurance risk outlook as stable, supported by active management of market cycles across all lines of business, we recognise that the cycle of rate increases have likely peaked and in the absence of a market turning event, we anticipate further soft market pressures in the near term, making effective risk management increasingly critical.</p> |
| <p>Credit</p> <p>Exposure to credit risk largely emanates from the use of reinsurers, brokers, and coverholders.</p> <p>Credit risk is the risk of loss resulting from default in obligations due or changes in the credit standing of either issuers of securities, counterparties or any debtors which Beazley is exposed to.</p> | <p>Beazley maintains long-term partnerships with strategic reinsurance partners to support it throughout the insurance cycle and during potential catastrophic claim events. Beazley uses a range of traditional and alternative reinsurance mechanisms to diversify reinsurance credit risk. All reinsurers must meet stringent internal approval criteria, overseen by the Reinsurance Security Committee.</p> <p>Beazley operates established broker relationships and mitigates credit risk via the monitoring of broker concentrations, payment performance oversight and broker onboarding review criteria.</p> <p>Coverholder monitoring and onboarding utilises a risk-based approach, using financial stability information, overseen by the Delegated Authority Oversight Committee.</p> <p>Investment credit risks are managed with a well-diversified portfolio, with investment parameters by type, duration and credit quality, monitored by the Investment Committee.</p> <p>Outlook: The credit risk outlook remains stable, as Beazley manages reinsurance, broker, coverholder and investment credit risks, maintaining low levels of aged and/or bad debt.</p> |

| Principal risks and summary descriptions | Mitigation and monitoring |
|------------------------------------------|---------------------------|
|------------------------------------------|---------------------------|

 **Market**
 The risk of loss resulting from fluctuations in the level and in the volatility of market prices of assets, liabilities and financial instruments. Investment assets may be impacted by adverse movements in financial markets, interest rates, exchange rates, or external market forces.

Beazley operates a conservative investment strategy to ensure adequate funds available to pay claims. We employ robust policies and tools to manage market risk, ensuring alignment with regulatory requirements and industry best practices.

Interest rate and foreign exchange risks are managed using natural hedges and financial instruments, minimizing potential volatility. The Investment Committee regularly reviews market risk exposures to ensure that our risk management capabilities remain agile and effective in responding to evolving market dynamics.

Beazley continues to develop its understanding of how climate change impacts our investment portfolio to help inform alignment with our sustainability goals and create long-term value.

Outlook:
 We maintain a stable market risk outlook for 2026, underpinned by active investment portfolio management and a robust internal control framework.

 **Group**
 The contagion risk that an action or inaction of one part of the Beazley Group adversely affect another part or parts of the syndicate. This also includes a changes in culture which leads to inappropriate behaviour, actions and/or decisions including dilution of culture or negative impact on the brand.

In 2025, Beazley further developed its Risk Culture Framework, to align with industry best practice. The framework is underpinned by six guiding principles: Leadership and Tone from the Top; Risk Governance and Accountability; Risk Awareness; Communication and Transparency; Risk and Reward; and Innovation and Adaptiveness.

A strong risk culture is the cornerstone of a mature risk function. It enables informed and responsible decision-making, fosters transparency, and promotes vigilance across both existing and emerging risks, ensuring Beazley remains resilient and forward-looking in an evolving risk and regulatory landscape. In 2025, advancing our risk culture maturity was a key management priority. A series of organisation-wide initiatives were launched to strengthen communication and engagement, with the aim of cultivating a consistent and robust risk culture. These efforts focused on building a shared understanding of risk, encouraging proactive management, and reinforcing a supportive 'speak up' environment.

Beazley operates shared services, systems, processes and controls across different legal entities and jurisdictions. As such, the impact of an issue or incident in one area of the business can have implications across the Group (i.e. contagion risk). To mitigate this risk we continue focus on group-wide strategic initiatives, which include continued enhancement of our internal control environment and optimization of key business and IT processes through deployment of technology solutions.

The BFL Management Committee and the Board oversee Group risk, with regular monitoring conducted by the Risk Function and overseen by the Risk Committee.

Outlook:
 Our Group risk outlook remains stable, with the BFL Management Committee continuously evolving our risk culture through ongoing monitoring and annual assessments, designed to drive enhancements.

| <p> Liquidity Investments and/or other assets are not available or adequate in order to settle financial obligations when they fall due.</p> | <p>By actively managing its liquidity needs, Beazley maximizes flexibility in handling its financial assets and investment strategy. This proactive approach ensures that clients and creditors are financially protected. Beazley regularly evaluates the liquidity position of the syndicates, under the oversight of the Risk Committee.</p> <p>Liquidity stress testing is performed to assess the largest cash flow demands from the ten most severe Realistic Disaster Scenarios (RDSs) across a 1-day and 12-month time horizon.</p> <p>Liquidity is monitored quarterly to ensure an adequate liquidity surplus is maintained, such that liquidity exceeds internal requirements, even under stressed scenarios.</p> <p>Outlook: The liquidity risk outlook remains stable, with sufficient available liquidity to meet expected cashflow requirements, including under stressed scenarios, while maintaining adequate levels of liquidity and capital buffers.</p> |
| <p> Regulatory and legal The risk of non-compliance with regulatory and legal requirements and supervisory expectations or failing to operate in line with the relevant regulatory framework in the territories where Beazley operates. This may lead to financial loss (fines, penalties), sanctions, reputational damage, loss of confidence from regulators, regulatory intervention, inability to underwrite or pay claims.</p> | <p>Beazley's compliance framework supports adherence to rules, laws and regulatory expectations including through horizon scanning, advice and training. The work of the compliance function is overseen by the Risk and Regulatory Committee.</p> <p>In 2025, we implemented a global horizon scanning tool to support the increasing size and complexity of our multi-jurisdictional business. This tool aids in identifying, assessing and implementing new and emerging legal and regulatory policy in a way that is both accessible and immediate across all areas of our business and locations that we underwrite. Additionally, it helps to increase awareness of the regulatory environment for a wider audience, strengthens our adherence to requirements and provides additional clarity over the expectations of our regulators.</p> <p>We enhanced our regulatory engagement protocols by developing a new framework, establishing oversight and strengthening our reporting mechanisms for sharing key information with our regulators. To ensure effective embedding of the new protocols and further strengthen our culture of transparency and openness, we provided firm-wide training to ensure that expectations are understood.</p> <p>Delivering good customer outcomes remains central to our business. The second line functions contribute to the work of the Conduct Review Group, which provides oversight of conduct risk throughout the product lifecycle, ensuring we are able to consistently meet regulatory expectations for the treatment of our policyholders and retail customers.</p> <p>Beazley maintains a very low appetite for regulatory and legal risk. As we consolidate the regulatory engagement achieved in 2025 and navigate an increasingly complex environment, maintaining strong and open relationships with our regulators remains paramount.</p> <p>Outlook: The outlook for this risk has moved from increased to stable as a result of the positive action taken above. We also continue to enhance our key systems and internal control frameworks as well as adapting our compliance framework to adhere to our regulatory and compliance landscape. We expect the risk outlook to improve as changes become well embedded.</p> |

| Principal risks and summary descriptions | Mitigation and monitoring |
|------------------------------------------|---------------------------|
|------------------------------------------|---------------------------|

Operational
 The risk of failure of people, processes and systems or the impact of an external event on Beazley's operations

Primary risk drivers include technology, information management, project and change transformation, third-party management and the process and people related infrastructure supporting core business activities; Underwriting and Claims management.

Our risks and controls are formally monitored and reported through a risk and control self-assessment process and the use of quantifiable KRIs. Our ongoing control enhancement and underwriting transformation programmes are designed to ensure that Beazley is fully equipped to meet current and future operational challenges, strengthening our resilience and supporting sustainable growth.

In 2025, we further advanced our investment in technology and process re-engineering to strengthen our operational capabilities and add resilience to internal processes and associated controls. Our business continuity, disaster recovery and incident response plans ensure the stability of our processes and systems, enabling our team to consistently deliver optimal outcomes for our clients.

As the external environment grows more complex, technology and cyber resilience remain top priorities. We have advanced our cyber maturity journey, collaborating with external agencies, and maintaining robust controls over information security, data and operational resilience. Regular reviews of our incident response plans and ongoing investment in cyber security training for all employees ensure we remain vigilant and prepared.

While maintaining a low appetite for operational risk, we observed an increase in reported risk incidents during 2025, albeit of lower materiality, reflecting both the growing complexity of our operational environment and our enhanced risk awareness and reporting culture. Our Risk Function works closely with first line teams to ensure that controls and processes evolve in line with emerging risks and business change.

Outlook:

This risk has moved from an increased to stable outlook in 2026, reflecting a reduction in the severity of operational risk incidents. This is supported by the continued benefits of our investment in modernising controls, systems and processes. As our transformation programmes and modernisation initiatives progress, we expect these efforts to further enhance our operational resilience in the years ahead.

Strategic
 The risk of loss resulting from ineffective strategic direction and implementation that leads to inadequate profitability, financial loss and/or reputational damage.

Pervasive risks impacting multiple areas of Beazley (e.g., reputation, and sustainability) occurring through real or perceived action, or inaction, by a regulatory body, market and/or third-party provider.

A negative change to Beazley's reputation would have a detrimental impact to BFL and the syndicates performance and public perception.

Beazley consistently addresses key strategic opportunities and challenges, striving to be the highest performing and most sustainable specialist insurer. We ensure that we recognise, understand, discuss, and develop action plans for significant strategic priorities in a timely manner, while maintaining operational effectiveness and brand reputation.

More widely over the past 18 months, Beazley has made enhancements to its corporate governance arrangements to align to a three-platform model. It aims to ensure that the legal entities benefit from increased transparency, and clarity around decision-making powers & autonomy, which aims to de-risk the organisation. The three platform model has been implemented and will continue to be embedded throughout 2026.

Beazley creates an environment that attracts, retains and develops high performing talent with diverse perspectives, encouraging exploration, creation, and innovation. By investing in understanding the complexities of the risks our clients face and deploying our expertise where it adds value, we thrive. The BFL Management Committee and the Board oversee these risks, in collaboration with the Group Executive Committee.

We maintain capital in excess of regulatory requirements to support our business plan and strategic objectives across the short, medium, and long term.

Our commitment is to create a sustainable business for our people, partners, and planet through responsible business goals. This focuses on understanding and reducing our carbon footprint, contributing positively to our social environment, and upholding strong governance practices. Sustainability principles are embedded into business planning with a documented transition plan and reputational risk is mitigated through transparent climate-related decision-making across underwriting, investments and operations. While market developments are considered, each is evaluated individually to balance potential opportunities and risks.

Outlook:

As we build on our past achievements, our outlook for strategic risk in 2026 remains stable, underpinned by our commitment to disciplined growth, innovation and sustainability.

A full list of the Directors of the managing agent who held office during the year can be found on page 68 of these syndicate's annual accounts.

Syndicate annual general meeting

In accordance with the Syndicate Meetings (Amendment No. 1) Byelaw (No. 18 of 2000) the managing agent does not propose to hold a syndicate annual meeting this year. Members may object to this proposal within 21 days of this notice. Any objections must be made in writing to the managing agent.

Disclosure of information to the auditor

The Directors of the managing agent who held office at the date of approval of this managing agent's report confirm that, so far as they are each aware, there is no relevant audit information of which the syndicate's auditor is unaware; and each Director has taken all the steps that they ought to have taken as a director to make themselves aware of any relevant audit information and to establish that the syndicate's auditor is aware of that information.

Auditor

Pursuant to Section 14(2) of Schedule 1 of the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008, the auditor will be deemed to be reappointed and Ernst & Young LLP will therefore continue in office.

On behalf of the Board

C C J Wong

Director

19 February 2026

Statement of managing agent's responsibilities

The Directors of the managing agent are responsible for preparing the syndicate financial statements in accordance with applicable law and regulations.

The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 requires the Directors of the managing agent to prepare their syndicate annual accounts for each financial year. Under that law they have elected to prepare the annual accounts in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland.

Under Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 the Directors of the managing agent must not approve the annual accounts unless they are satisfied that they give a true and fair view of the state of affairs of the syndicate and of the profit or loss of the syndicate for that period. In preparing these financial statements, the Directors of the managing agent are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the annual accounts;
- assess the syndicate's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to cease trading, or have no realistic alternative but to do so.

The Directors of the managing agent are responsible for keeping adequate accounting records that are sufficient to show and explain the syndicate's transactions and disclose with reasonable accuracy at any time the financial position of the syndicate and enable them to ensure that the financial statements comply with the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

The Directors of the managing agent are responsible for the maintenance and integrity of the syndicate and financial information included on the syndicate's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The Directors of the managing agent are required to comply with the requirements of Section 1 of the Lloyd's Syndicate Accounts Instructions version 3.1 as modified by the Frequently Asked Questions Version 1.1 issued by Lloyd's (the 'Syndicate Accounts Instructions').

The Directors of the managing agent are responsible for the preparation and review of the iXBRL tagging that has been applied to the syndicate accounts in accordance with the instructions issued by Lloyd's, including designing, implementing and maintaining systems, processes and internal controls to result in tagging that is free from material non-compliance with the instructions issued by Lloyd's, whether due to fraud or error.

We confirm that to the best of our knowledge the syndicate accounts, including the iXBRL tagging applied to these accounts, comply with the requirements of the Lloyd's Syndicate Accounts Instructions version 3.1 as modified by the Frequently Asked Questions version 1.1 issued by Lloyd's.

On behalf of the Board

C C J Wong

Director

19 February 2026

Independent auditor's report to the members of Syndicate 623

Opinion

We have audited the syndicate annual accounts of syndicate 623 ('the syndicate') for the year ended 31 December 2025 which comprise the Statement of Comprehensive Income, the Balance Sheet, the Statement of Changes In Members' Balances, the Statement of Cash Flows and the related notes 1 to 24, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law including The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008, United Kingdom Accounting Standards including FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and FRS 103 'Insurance Contracts' ('United Kingdom Generally Accepted Accounting Practice'), and Section 1 of the Lloyd's Syndicate Accounts Instructions V3.1 as modified by the Frequently Asked Questions Version 1.1 issued by Lloyd's ('the Syndicate Accounts Instructions').

In our opinion, the syndicate annual accounts:

- give a true and fair view of the syndicate's affairs as at 31 December 2025 and of its Profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 and the Syndicate Accounts Instructions.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)), The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008, the Syndicate Accounts Instructions, and other applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the syndicate annual accounts section of our report. We are independent of the syndicate in accordance with the ethical requirements that are relevant to our audit of the syndicate annual accounts in the UK, including the FRC's Ethical Standard as applied to other entities of public interest, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the syndicate annual accounts, we have concluded that the managing agent's use of the going concern basis of accounting in the preparation of the syndicate annual accounts is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the syndicate's ability to continue as a going concern for a period of 12 months from when the syndicate annual accounts are authorised for issue. from when the syndicate annual accounts are authorised for issue.

Our responsibilities and the responsibilities of the directors of the managing agent with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the syndicate's ability to continue as a going concern.

Other information

The other information comprises the information included in the annual report and accounts other than the syndicate annual accounts and our auditor's report thereon. The directors of the managing agent are responsible for the other information contained within the annual report and accounts.

Our opinion on the syndicate annual accounts does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the syndicate annual accounts or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the syndicate annual accounts themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the managing agent's report for the financial year in which the syndicate annual accounts are prepared is consistent with the syndicate annual accounts; and
- the managing agent's report has been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the syndicate and its environment obtained in the course of the audit, we have not identified material misstatements in the managing agent's report.

We have nothing to report in respect of the following matters where The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 requires us to report to you, if in our opinion:

- the managing agent in respect of the syndicate has not kept adequate accounting records; or
- the syndicate annual accounts are not in agreement with the accounting records; or
- certain disclosures of the managing agent's emoluments specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of the managing agent

As explained more fully in the Statement of Managing Agent's Responsibilities set out on page 17, the directors of the managing agent are responsible for the preparation of the syndicate annual accounts and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of the syndicate annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the syndicate annual accounts, the directors of the managing agent are responsible for assessing the syndicate's ability to continue in operation, disclosing, as applicable, matters related to its ability to continue in operation and using the going concern basis of accounting unless the directors of the managing agent either intends to cease to operate the syndicate, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the syndicate annual accounts

Our objectives are to obtain reasonable assurance about whether the syndicate annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these syndicate annual accounts.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the managing agent and management.

Independent auditor's report to the members of Syndicate 623 continued

Our approach was as follows:

- We obtained a general understanding of the legal and regulatory frameworks that are applicable to the syndicate and determined that the most significant are direct laws and regulations related to elements of Lloyd's Byelaws and Regulations, and the financial reporting framework (UK United Kingdom Generally Accepted Accounting Practice), and requirements referred to by Lloyd's in the Syndicate Accounts instructions. Our considerations of other laws and regulations that may have a material effect on the syndicate annual accounts included permissions and supervisory requirements of Lloyd's of London, the Prudential Regulation Authority ('PRA') and the Financial Conduct Authority ('FCA').
- We obtained a general understanding of how the syndicate is complying with those frameworks by making enquiries of management, internal audit, and those responsible for legal and compliance matters of the syndicate. In assessing the effectiveness of the control environment, we also reviewed significant correspondence between the syndicate, Lloyd's of London and other UK regulatory bodies; reviewed minutes of the Board and Risk Committee of the managing agent; and gained an understanding of the managing agent's approach to governance.
- For direct laws and regulations, we considered the extent of compliance with those laws and regulations as part of our procedures on the related syndicate annual accounts' items.
- For both direct and other laws and regulations, our procedures involved: making enquiries of the directors of the managing agent and senior management for their awareness of any non-compliance of laws or regulations, enquiring about the policies that have been established to prevent non-compliance with laws and regulations by officers and employees, enquiring about the managing agent's methods of enforcing and monitoring compliance with such policies, and inspecting significant correspondence with Lloyd's, the PRA and the FCA and involvement of relevant specialists, including forensics specialists and inquiring about the appointment of external advisors, including legal counsel, as applicable.
- The syndicate operates in the insurance industry which is a highly regulated environment. As such the Senior Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities, which included the use of specialists where appropriate.
- We assessed the susceptibility of the syndicate's annual accounts to material misstatement, including how fraud might occur by considering the controls that the directors of the managing agent have established to address risks identified by them, or that otherwise seek to prevent, deter or detect fraud. We also considered areas of significant judgement, complex transactions, performance targets, economic or external pressures and the impact these have on the control environment. Where this risk was considered to be higher, we performed audit procedures to address each identified fraud risk, including:
 - Reviewing accounting estimates for evidence of management bias. Supported by our Actuaries, we assessed if there were any indicators of management bias in the valuation of insurance liabilities and the recognition of estimated premium income.
 - Evaluating the business rationale for significant and/or unusual transactions.
 - Testing the appropriateness of journal entries recorded in the general ledger, particularly in respect of judgemental areas including valuation of insurance liabilities and estimated premium income.

A further description of our responsibilities for the audit of the annual accounts is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Other matter

Our opinion on the syndicate annual accounts does not cover the iXBRL tagging included within these syndicate annual accounts, and we do not express any form of assurance conclusion thereon.

Use of our report

This report is made solely to the syndicate's members, as a body, in accordance with The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008. Our audit work has been undertaken so that we might state to the syndicate's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the syndicate and the syndicate's members as a body, for our audit work, for this report, or for the opinions we have formed.

Niamh Byrne (Senior statutory auditor)
for and on behalf of Ernst & Young LLP, Statutory Auditor
London

Notes to the syndicate annual accounts

1 Accounting policies

Basis of preparation

Syndicate 623 (the 'syndicate') comprises a group of members of the Society of Lloyd's that underwrites insurance business in the London Market. The managing agent of the syndicate is Beazley Furlonge Limited ('BFL'), whose registered address and principal place of business is 22 Bishopsgate, London, EC2N 4BQ. The ultimate controlling party of BFL is Beazley plc, a company incorporated in England and Wales.

The syndicate annual accounts have been prepared in accordance with the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008, applicable Accounting Standards in the United Kingdom and the Republic of Ireland, including Financial Reporting Standard 102 ('FRS 102'), Financial Reporting Standard 103 ('FRS 103') in relation to insurance contracts, and the Lloyd's Syndicate Accounts Instructions Version 3.1 as modified by the Frequently Asked Questions Version 1.1 issued by Lloyd's.

The financial statements have been prepared on the historic cost basis, except for financial assets at fair value through profit or loss ('FVTPL') which are measured at fair value. All amounts presented are stated in US dollars, being the syndicate's functional currency, and in thousands, unless noted otherwise.

Going concern

The financial statements of the syndicate have been prepared on a going concern basis. The syndicate's business activities, together with the factors likely to affect its future development, performance and position, are set out in the Strategic report of the managing agent (refer to pages 2 - 9). In addition, note 2 includes the syndicate's risk management objectives and the managing agent's objectives, policies and processes for managing its capital. The syndicate has sufficient capital for each year of account in its Funds at Lloyd's. There is no intention to cease underwriting or cease the operations of the syndicate.

In assessing the syndicate's going concern position as at 31 December 2025, the managing agent has considered a number of factors, including the current statement of financial position and the syndicate's strategic and financial plan. The assessment concluded that, for the foreseeable future, the syndicate has sufficient capital and liquidity for the 12 months from the date the financial statements are authorised for issue.

Use of estimates and judgements

The preparation of financial statements requires the use of estimates and judgements that affect the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those on which management's estimates are based. Estimates and assumptions are continually evaluated and are based on historical experience and other factors. For example, estimates which are sensitive to economic, regulatory and geopolitical conditions could be impacted by significant changes in the external environment such as the volatile macroeconomic environment, climate change, international conflicts, and significant changes in legislation. Any revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

Specific to climate change, since responses to it are still developing, it is not possible to consider all possible future outcomes when determining asset and liability valuations, and timing of future cash flows, as these are not yet known. Nevertheless, the current management view is that reasonably possible changes arising from climate risks would not have a material impact on asset and liability valuations at the year-end date.

(a) Valuation of insurance contract liabilities

The most critical estimate included within the syndicate's balance sheet is the estimate for insurance losses incurred but not reported ('IBNR'), which is included within total technical provisions and reinsurers' share of technical provisions in the balance sheet and note 15. This estimate is critical as it outlines the current liability for future expenses expected to be incurred in relation to claims. If this estimation was to prove inadequate then an exposure would arise in future years where a liability has not been provided for. The best estimate of the most likely ultimate outcome is used when calculating notified claims. This estimate is based upon the facts available at the time, in conjunction with the claims manager's view of likely future developments. The total estimate of gross IBNR as at 31 December 2025 included within claims outstanding on the balance sheet is \$1,095,051k (2024: \$1,065,289k).

Notes to the Syndicate annual accounts continued

1 Accounting policies continued

(b) Valuation of unquoted and illiquid financial assets

Determination of fair value of unquoted and illiquid assets involves judgement in model valuations, through the incorporation of both observable and unobservable market inputs. These inputs include assumptions that lead to the existence of a range of plausible valuations. Further detail on the methodologies and inputs used is described in note 9.

(c) Premium estimates

Premium written is initially based on the estimated premium income ('EPI') of each contract. Where premium is sourced through binders, the binder EPI is pro-rated across the binder period. Judgement is involved in determining the ultimate estimates in order to establish the appropriate premium value and, ultimately, the cash to be received. EPI estimates are updated to reflect changes in an underwriters expectation through consultation with brokers and third-party coverholders, changes in market conditions, historic experience and to reflect actual cash received for a contract.

Due to the nature of Lloyd's business and the settlement patterns of the underlying business it is also not uncommon for some contracts to take a number of years to finalise and settle, and a receivable on the balance sheet remains. The amount of estimated future premium that remains in debtors relating to years of account that are more than three years developed at 31 December 2025 is \$5,396k (2024: \$5,358k).

Significant accounting policies

The financial statements have been prepared on an annual basis of accounting, whereby the incurred cost of claims, commissions and related expenses are charged against the earned proportion of premiums, net of reinsurance as follows:

(a) Premiums written

Gross premiums written comprise premiums on contracts incepted during the financial year together with adjustments to premiums written in previous accounting periods and estimates for premiums from contracts entered into during the course of the year. Gross written premiums are stated before the deduction of brokerage, taxes, duties levied on premiums and other deductions.

(b) Unearned premiums

A provision for unearned premiums (gross of reinsurance) represents the part of the gross premiums written that is estimated to be earned in the following financial periods. It is calculated using the daily pro-rata method, under which the premium is apportioned over the period of risk.

(c) Claims provisions and related reinsurance recoveries

Claims represent the cost of claims and claims handling expenses paid during the financial year, together with the movement in provisions for outstanding claims, claims IBNR and future claims handling provisions. The provision for outstanding claims comprises amounts set aside for claims advised and IBNR.

The IBNR amount is based on estimates calculated using widely accepted actuarial techniques which are reviewed quarterly by the group actuary and annually by the independent syndicate reporting actuary. The techniques generally use projections, based on past experience of the development of claims over time, to form a view on the likely ultimate claims to be experienced. For more recent underwriting, regard is given to the variations in the business portfolio accepted and the underlying terms and conditions. Thus, the critical assumptions used when estimating claims provisions are that the past experience is a reasonable predictor of likely future claims development and that the rating and other models used to analyse current business are a fair reflection of the likely level of ultimate claims to be incurred.

A provision is made at the year end for the estimated cost of claims incurred but not settled at the balance sheet date, including the cost of claims incurred but not yet reported to the managing agent. The managing agent takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established.

1 Accounting policies continued

(d) Liability adequacy testing

At each reporting date, liability adequacy tests are performed to ensure the adequacy of the claims liabilities net of deferred acquisition costs and unearned premium reserves. In performing these tests, current best estimates of future contractual cash flows, claims handling and administration expenses as well as investment income from the assets backing such liabilities are used.

Any deficiency is subsequently charged to the statement of comprehensive income by establishing an unexpired risk reserve provision for losses arising from liability adequacy tests.

(e) Acquisition costs

Acquisition costs comprise brokerage, premium levies, and staff related costs of the underwriters acquiring the business. The proportion of acquisition costs in respect of unearned premiums is deferred at the balance sheet date and recognised in later periods when the related premiums are earned.

(f) Foreign currencies

Foreign currency transactions are translated into the functional currency using average exchange rates applicable to the period in which the transactions take place and where the syndicate considers these to be a reasonable approximation of the transaction rate. Foreign exchange gains and losses resulting from the settlement of such transactions and from translation at the period end of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

(g) Investment return

Investment return comprises all investment income, realised investment gains and losses and movements in unrealised gains and losses, net of investment expenses, charges and interest.

Realised gains and losses on investments carried at market value are calculated as the difference between sale proceeds and the original cost of the investment. Movements in unrealised gains and losses on investments represent the difference between the valuation at the balance sheet date, and the valuation at the previous period end or purchase value during the period. Investment return is initially recorded in the non-technical account. A transfer is made from the non-technical account to the general business technical account to reflect the investment return on funds supporting underwriting business.

(h) Ceded reinsurance

These are contracts entered into by the syndicate with reinsurers under which the syndicate is compensated for losses on contracts issued by the syndicate and that meet the definition of an insurance contract. Insurance contracts entered into by the syndicate under which the contract holder is another insurer (inwards reinsurance) are included with insurance contracts.

Any benefits to which the syndicate is entitled under its reinsurance contracts held are recognised as reinsurance assets. These consist of balances due from reinsurers relating to claims and also includes the provision for unearned premiums, reinsurers' share. Balances due relating to the reinsurers share of claims are based on calculated amounts of outstanding claims recoveries and projections for IBNR, net of estimated irrecoverable amounts having regard to the reinsurance programme in place for the class of business, the claims experience for the period and the current security rating of the reinsurer involved. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due.

Reinsurance assets are assessed for impairment at each reporting date. If there is objective evidence of impairment, then the carrying amount is reduced to its recoverable amount and the impairment loss is recognised in the statement of comprehensive income.

(i) Financial instruments

Recognition and derecognition

Financial instruments are recognised on the balance sheet at such time that the syndicate becomes a party to the contractual provisions of the financial instrument. A financial asset is derecognised when:

- the contractual rights to receive cash flows from the financial assets expire;
- the financial assets have been transferred, together with substantially all the risks and rewards of ownership; or
- despite having retained some, but not substantially all, risks and rewards of ownership, control of the asset is transferred to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party.

Financial liabilities are derecognised if the syndicate's obligations specified in the contract expire, are discharged or cancelled.

Notes to the Syndicate annual accounts continued

1 Accounting policies continued

Financial assets and liabilities measurement

On acquisition of a financial asset or liability, the asset or liability is measured at the transaction price, except for those financial assets and liabilities at FVTPL, which are initially measured at fair value. The exception to this is when the arrangement constitutes a financing transaction however, the syndicate does not make use of any such arrangements.

Except for derivative financial investments, all financial investments are designated as FVTPL upon initial recognition because they are managed and their performance is evaluated on a fair value basis. Information about these financial instruments is provided internally on a fair value basis to key management. The investment strategy is to invest and evaluate their performance with reference to their fair values.

Fair value measurement

Fair value is the price at which an orderly transaction to sell an asset or to transfer a liability would take place between market participants at the measurement date. Fair value is a market-based measure and in the absence of observable market prices in an active market, it is measured using the assumptions that market participants would use when pricing the asset or liability.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price, i.e., the fair value of the consideration given or received, unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e., without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets.

When the transaction price provides the best evidence of fair value at initial recognition, the financial instrument is initially measured at the transaction price and any difference between this price and the value initially obtained from a valuation model is subsequently recognised in the statement of comprehensive income depending on the individual facts and circumstances of the transaction but not later than when the valuation is supported wholly by observable market data or the transaction is closed out.

Upon initial recognition, attributable transaction costs relating to financial instruments at FVTPL are recognised in the statement of comprehensive income when incurred. Financial assets at FVTPL are continuously measured at fair value, and changes therein are recognised in the statement of comprehensive income. Net changes in the fair value of financial assets at FVTPL exclude interest and dividend income, as these items are accounted for separately.

Hedge funds, equity funds, collateralised loan obligations, and illiquid credit assets

The syndicate participates in a number of hedge funds and related financial instruments for which there are no readily available quoted market prices. The valuation of these hedge funds is based on fair value techniques (as described above). The fair value of our hedge fund portfolio is calculated by reference to the underlying net asset values of each of the individual funds. Consideration is also given in valuing these funds to any restriction applied to distributions, the existence of side pocket provisions, and the timing of the latest available valuations. At certain times, the syndicate will have uncalled unfunded commitments in relation to its illiquid credit assets. The additional investment into its illiquid credit asset portfolio is recognised on the date that this funding is provided. These instruments are included within shares and other variable yield securities and units in unit trusts. The syndicate also invests in a number of collateralised loan obligations ('CLOs'). The valuation of these CLOs is based on fair value techniques (as described above). The CLOs are included within debt securities and other fixed income securities.

(j) Insurance debtors and creditors

Insurance debtors and creditors include amounts due to and from agents, brokers and insurance contract holders. These are classified as debt instruments as they are non-derivative financial assets with fixed or determinable payments that are not quoted on an active market. Insurance debtors are measured at amortised cost less any provision for impairments. Insurance creditors are stated at amortised cost. The syndicate does not have any debtors directly with policyholders, all transactions occur via an intermediary. For information on reinsurance debtors and creditors, refer to section (h) above.

(k) Other debtors

Other debtors principally consist of intercompany debtor balances and sundry debtors and are carried at amortised cost less any impairment losses.

(l) Other creditors

Other creditors principally consist of amounts due to Syndicate 2623, 6107, 3623, and other related entities, and profit commissions payable. These are stated at amortised cost determined using the effective interest rate method.

1 Accounting policies continued

(m) Derivative financial instruments

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value. The best evidence of fair value of a derivative at initial recognition is the transaction price. Fair values are obtained from quoted market prices in active markets, recent market transactions, and valuation techniques which include discounted cash flow models. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

Derivative assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to set off the recognised amounts and the parties intend to settle on a net basis, or realise the assets and settle the liability simultaneously. Derivative assets are included within Financial investments in the Balance Sheet. Derivative liabilities are included within other creditors.

(n) Impairment of financial assets

Assessment is made at each reporting date whether there is objective evidence that a financial asset or group of financial assets measured at amortised cost is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the assets and that event has an impact on the estimated cash flows of the financial asset or group of financial assets that can be reliably estimated.

If there is objective evidence that impairment exists, the amount of the loss is measured as the difference between the assets carrying amount and the value of the estimated future cash flows discounted at the financial asset's original effective interest rate. Where a loss is incurred this is recognised in the statement of comprehensive income.

(o) Cash and cash equivalents

Cash and cash equivalents are comprised of cash at bank and in hand, in addition to deposits held at call with banks and other short-term highly liquid investments with maturities of three months or less from the acquisition date. Only cash at bank and in hand is presented separately on the face of the balance sheet, while cash equivalents are included within the 'financial investments' line. Cash and cash equivalents are shown in aggregate on the cash flow statement and at note 19. These are carried at amortised cost less impairment losses.

(p) Taxation

Under Schedule 19 of the Finance Act 1993 managing agents are not required to deduct basic rate income tax from trading income. In addition, all UK basic rate income tax (20%) deducted from syndicate investment income is recoverable by managing agents and consequently the distribution made to members or their members' agents is gross of tax. Capital appreciation falls within trading income and is also distributed gross of tax.

No provision has been made for any US federal income tax payable on underwriting results or investment earnings. Any payments on account made by the syndicate during the year have been included in the balance sheet under the heading 'other debtors'. No provision has been made for any other overseas tax payable by members on underwriting results.

(q) Pension costs

Pension contributions relating to staff who act on behalf of the syndicate are charged to the syndicate and included within net operating expenses.

(r) Profit commission

Profit commission is charged by the managing agent at a rate of 17.5% of the profit on a YoA basis subject to the operating of a two-year deficit clause. This is charged to the syndicate as incurred but does not become payable until after the appropriate YoA closes, normally at 36 months of YoA development.

Notes to the Syndicate annual accounts continued

2 Risk management

The managing agent has identified the risks arising from its activities and has established policies and procedures to manage these items in accordance with its risk appetite. The sections below outline the syndicate's risk appetite and explain how the managing agent defines and manages each category of risk. The risk management framework is discussed in the managing agent's report.

2.1 Insurance risk

The syndicate's insurance business assumes the risk of loss from persons or organisations that are directly exposed to an underlying loss. Insurance risk arises from this risk transfer due to inherent uncertainties about the occurrence, amount and timing of insurance liabilities. The four key components of insurance risk are underwriting, reinsurance, claims management and reserving. Each element is considered below.

(a) Underwriting risk

Underwriting risk comprises four elements that apply to all insurance products offered by the syndicate:

- cycle risk – the risk that business is written without full knowledge as to the (in)adequacy of rates, terms and conditions;
- event risk – the risk that individual risk losses or catastrophes lead to claims that are higher than anticipated in plans and pricing;
- pricing risk – the risk that the level of expected loss is understated in the pricing process; and
- expense risk – the risk that the allowance for expenses and inflation in pricing is inadequate.

The syndicate's underwriting strategy is to seek a diverse and balanced portfolio of risks in order to limit the variability of outcomes. This is achieved by accepting a spread of business over time, segmented between different products, geography and size. The annual business plans for each underwriting team reflect the syndicate's underwriting strategy, and set out the classes of business, the territories and the industry sectors in which business is to be written. These plans are approved by the Board of BFL and monitored by the Underwriting Committee. BFL's underwriters calculate premiums for risks written based on a range of criteria tailored specifically to each individual risk. These factors include but are not limited to the financial exposure, loss history, risk characteristics, limits, deductibles, terms and conditions and acquisition expenses.

The managing agent also recognises that insurance events are, by their nature, random, and the actual number and size of events during any one year may vary from those estimated using established statistical techniques. To address this, the managing agent sets out the exposure that it is prepared to accept in certain territories to a range of events such as natural catastrophes and specific scenarios which may result in large industry losses. This is monitored through regular calculation of Realistic Disaster Scenarios. The aggregate position is monitored at the time of underwriting a risk, and reports are regularly produced to highlight the key aggregations to which the syndicate is exposed.

The managing agent uses a number of modelling tools to monitor its exposures against the agreed risk appetite set and to simulate catastrophe losses in order to measure the effectiveness of its reinsurance programmes. Stress and scenario tests are also run using these models. The range of scenarios considered include natural catastrophes, cyber, marine, liability, political, terrorism and war events.

One of the largest types of event exposure relates to natural catastrophe events such as windstorms or earthquake. With the increasing risk from climate change impacting the frequency and severity of natural catastrophes, the managing agent continues to monitor its exposure. Where possible the managing agent measures geographic accumulations and uses its knowledge of the business, historical loss behaviour and commercial catastrophe modelling software to assess the expected range of losses at different return periods. Upon application of the reinsurance coverage purchased, the key gross and net exposures are calculated on the basis of extreme events at a range of return periods.

To manage underwriting exposures, the managing agent has developed limits of authority and business plans which are binding upon all staff authorised to underwrite and are specific to underwriters, classes of business and industry. These authority limits are enforced through a comprehensive sign-off process for underwriting transactions including dual sign-off for all line underwriters and peer review for all risks exceeding individual underwriters authority limits. Exception reports are also run regularly to monitor compliance. All underwriters also have a right to refuse renewal or change the terms and conditions of insurance contracts upon renewal. Rate monitoring details, including limits, deductibles, exposures, terms and conditions and risk characteristics are also captured and the results are combined to monitor the rating environment for each class of business.

2 Risk management continued

Binding authority contracts

A proportion of the syndicate's insurance risks are transacted by third parties under delegated underwriting authorities. Each third party is thoroughly vetted by the managing agent's coverholder approval group before it can bind risks, and is subject to rigorous monitoring to maintain underwriting quality and confirm ongoing compliance with contractual guidelines.

(b) Reinsurance risk

Reinsurance risk to the syndicate arises where reinsurance contracts, put in place to reduce gross insurance risk, do not perform as anticipated, result in coverage disputes or prove inadequate in terms of the vertical or horizontal limits purchased. Failure of a reinsurer to pay a valid claim is considered a credit risk which is detailed separately below.

The syndicate's reinsurance programmes complement the underwriting team's business plans and seek to protect syndicate capital from an adverse volume or volatility of claims on both a per risk and per event basis. In some cases the syndicate deems it more economic to hold capital than to purchase reinsurance. These decisions are regularly reviewed as an integral part of the business planning and performance monitoring process.

The Reinsurance Security Committee examines and approves all reinsurers to ensure that they possess suitable security. The syndicate's ceded reinsurance team ensures that these guidelines are followed, undertakes the administration of reinsurance contracts, monitors and instigates responses to any erosion of the reinsurance programmes.

(c) Claims management risk

Claims management risk may arise within the syndicate in the event of inaccurate or incomplete case reserves and claims settlements, poor service quality or excessive claims handling costs. These risks may damage the Beazley brand and undermine its ability to win and retain business or incur punitive damages. These risks can occur at any stage of the claims life-cycle. The managing agent's claims teams are focused on delivering quality, reliability and speed of service to both internal and external clients. Their aim is to adjust and process claims in a fair, efficient and timely manner, in accordance with the policy's terms and conditions, the regulatory environment, and the business's broader interests. Prompt and accurate case reserves are set for all known claims liabilities, including provisions for expenses.

(d) Reserving and ultimate reserves risk

Reserving and ultimate reserves risk occurs within the syndicate where established insurance liabilities are insufficient through inaccurate forecasting, or where there is inadequate allowance for expenses and reinsurance bad debt provisions.

To manage reserving and ultimate reserves risk, the managing agent's actuarial team uses a range of recognised techniques to project gross premiums written, monitor claims development patterns and stress test ultimate insurance liability balances. An external independent actuary also performs an annual review to produce a statement of actuarial opinion for the syndicate. The objective of the syndicate's reserving policy is to produce accurate and reliable estimates that are consistent over time and across classes of business. The estimates of gross premiums written and claims prepared by the actuarial department are used through a formal quarterly peer review process to independently test the integrity of the estimates produced by the underwriting teams for each class of business. These meetings are attended by senior management, senior underwriters, actuarial, claims, and finance representatives.

The syndicate monitors its exposure to insurance risk and insured perils by location.

A set increase or decrease in total claims liabilities would have the following impact on profit and members' balances:

| Sensitivity to insurance risk (claims reserves) | Impact on profit and members' balances | |
|-------------------------------------------------|----------------------------------------|-----------|
| | 2025 | 2024 |
| | \$'000 | \$'000 |
| Claims outstanding - gross of reinsurance | 1,506,890 | 1,423,896 |
| Claims outstanding - net of reinsurance | 1,120,585 | 1,049,419 |
| 5% increase in gross claims reserve | (75,345) | (71,195) |
| 5% decrease in gross claims reserve | 75,345 | 71,195 |
| 5% increase in net claims reserve | (56,029) | (52,471) |
| 5% decrease in net claims reserve | 56,029 | 52,471 |

Notes to the Syndicate annual accounts continued

2 Risk management continued

2.2 Market risk

Market risk arises where the value of assets and liabilities changes as a result of movements in foreign exchange rates, interest rates and market prices.

Foreign exchange risk

The functional and presentational currency of the syndicate is the US dollar. The effect of this on foreign exchange risk is that the syndicate is exposed to fluctuations in exchange rates for non-dollar denominated transactions and net assets. Foreign exchange risk is actively managed as described below.

The syndicate has four main settlement currencies: US dollars, sterling, Canadian dollars and euro. Transactions in all currencies are converted to US dollars on initial recognition and revalued at the reporting date.

The syndicate's assets are broadly matched by currency to the principal underlying settlement currencies of its insurance liabilities. This helps mitigate the risk that future movements in exchange rates would materially impact the syndicate's assets required to cover its insurance liabilities.

The following table summarises the carrying value of total assets and total liabilities categorised by currency:

| | UK £ \$'000 | US \$ \$'000 | EUR € \$'000 | CAD \$ \$'000 | AUD \$ \$'000 | Other \$'000 | Total \$'000 |
|-------------------------------------------|------------------|--------------------|------------------|------------------|------------------|-----------------|--------------------|

2 Risk management continued

Sensitivity analysis - foreign exchange risk

In 2025, the managing agent managed the syndicate's foreign exchange risk by periodically assessing its non-dollar exposures and hedging these to a tolerable level while targeting net assets to be entirely US dollar denominated. As part of this hedging strategy, exchange rate derivatives were used to rebalance currency exposure. Details of foreign currency derivative contracts entered into with external parties are disclosed in note 10. On a forward looking basis an assessment is made of expected future exposure development and appropriate currency trades put in place to reduce risk.

Fluctuations in the syndicate's trading currencies against the US dollar would result in a change to profit and members' balances. The table below gives an indication of the impact on profit and members balances of a percentage change in relative strength of US dollar against the value of sterling, Canadian dollar, Australian dollar and euro, simultaneously.

| | Impact on profit and members' balances | |
|--------------------------------------------------------------------------------------------------------|----------------------------------------|---------|
| | 2025 | 2024 |
| Change in exchange rate of sterling, Canadian dollar, Australian dollar and euro relative to US dollar | \$'000 | \$'000 |
| Dollar weakens 10% against other currencies | 2,543 | (3,575) |
| Dollar strengthens 10% against other currencies | (2,543) | 3,575 |

Interest rate risk

Some of the syndicate's financial instruments, including financial investments and cash and borrowings, are exposed to movements in market interest rates.

The managing agent manages interest rate risk by primarily investing in short duration financial investments and cash. The Investment Committee monitors the duration of these assets on a regular basis.

The following table shows the average duration at the reporting date of the financial instruments that are exposed to movements in market interest rates. Duration is a commonly used measure of volatility which gives a better indication than maturity of the likely sensitivity of our portfolio to changes in interest rates.

| Duration | <1 yr | 1-2 yrs | 2-3 yrs | 3-4 yrs | 4-5 yrs | 5-10 yrs | >10 yrs | Total |
|-------------------------------------------------------------|----------------|----------------|----------------|----------------|---------------|---------------|----------|------------------|
| 31 December 2025 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 |

*Excluding equity securities.

Sensitivity analysis - interest rate risk

The syndicate holds financial assets and liabilities that are exposed to interest rate risk. Changes in interest yields, with all other variables constant, would result in changes in the capital value of debt and derivative financial instruments. This will affect reported profits and members' balances as indicated in the table below.

| | Impact on profit for the year ended | | Impact on members' balances | |
|-------------------------------|-------------------------------------|---------|-----------------------------|---------|
| | 2025 | 2024 | 2025 | 2024 |
| Shift in yield (basis points) | \$'000 | \$'000 | \$'000 | \$'000 |
| 50 basis point increase | (10,637) | (9,538) | (10,637) | (9,538) |
| 50 basis point decrease | 10,637 | 9,538 | 10,637 | 9,538 |

Price risk

Financial assets and derivatives that are recognised on the balance sheet at their fair value are susceptible to losses due to adverse changes in prices. This is referred to as price risk.

Financial assets include fixed and floating rate debt securities, hedge funds, equity funds and derivative financial assets. The fixed income securities are well diversified across high quality, liquid securities. The price risk associated with these securities is predominantly interest, foreign exchange and credit risk related. The sensitivity to price risk that relates to the syndicate's hedge fund investments and equity linked funds is presented below. The Investment Committee has established comprehensive guidelines with investment managers setting out maximum investment limits, diversification across industries and concentrations in any one industry or company.

Listed investments are recognised on the balance sheet at quoted bid price. If the market for the investment is not considered to be active, then the syndicate establishes fair value using valuation techniques (refer to note 9). This includes using recent arm's length market transactions, reference to current fair value of other investments that are substantially the same, discounted cash flow models and other valuation techniques that are commonly used by market participants.

| | Impact on profit for the year ended | | Impact on members' balances | |
|-----------------------------------------------------------------------------------|-------------------------------------|---------|-----------------------------|---------|
| | 2025 | 2024 | 2025 | 2024 |
| Change in fair value of hedge funds, equity linked funds & illiquid credit assets | \$'000 | \$'000 | \$'000 | \$'000 |
| 5% increase in fair value | 8,995 | 7,944 | 8,995 | 7,944 |
| 5% decrease in fair value | (8,995) | (7,944) | (8,995) | (7,944) |

2.3 Credit risk

Credit risk arises from the failure of another party to perform its financial or contractual obligations to the syndicate in a timely manner. The primary sources of credit risk for the syndicate are:

- reinsurers – whereby reinsurers may fail to pay valid claims against a reinsurance contract held by the syndicate;
- brokers and coverholders – whereby counterparties fail to pass on premiums or claims collected or paid on behalf of the syndicate;
- investments – whereby issuer default results in the syndicate losing all or part of the value of a financial instrument and derivative financial instrument; and
- cash at bank and in hand.

2 Risk management continued

The syndicate's core business is to accept significant insurance risk and the appetite for other risks is low. This protects the syndicate's capital from erosion so that it can meet its insurance liabilities.

The managing agent limits exposure to a single counterparty or a group of counterparties and analyses the geographical locations of exposures when assessing credit risk.

An approval system also exists for all new brokers, and broker performance is carefully monitored. Regular exception reports highlight trading with non-approved brokers, and the managing agent's credit control function frequently assesses the ageing and collectability of debtor balances. Any large, aged items are prioritised and where collection is outsourced, incentives are in place to support these priorities.

The Investment Committee has established comprehensive guidelines for the syndicate's investment managers regarding the type, duration and quality of investments acceptable to the syndicate. The performance of investment managers is regularly reviewed to confirm adherence to these guidelines.

The managing agent has developed processes to formally examine all reinsurers before entering into new business arrangements. New reinsurers are approved by the Reinsurance Security Committee, which also reviews arrangements with all existing reinsurers at least annually. Vulnerable or slow-paying reinsurers are examined more frequently.

The following tables summarise the syndicate's concentrations of credit risk for assets with credit risk. It shows amounts that neither past due nor impaired.

| | AAA | AA | A | BBB | Other | Not rated | Total |
|---------------------------------------------------------------------|----------------|----------------|----------------|---------------|---------------|----------------|------------------|

| Total | 157,890 | 652,704 | 586,393 | 145,502 | 83,830 | 620,141 | 2,246,460 |

Some amounts above were stated differently at year end 2024. The above table now only shows amounts that were neither past due nor impaired.

Financial investments falling within the unrated category comprise hedge funds for which there is no readily available market data to allow classification within the respective tiers. Additionally, some debtors are classified as unrated in accordance with Lloyd's guidelines.

The syndicate has insurance debtors and reinsurance assets that are past due but not impaired at the reporting date. An aged analysis of these is presented below:

| 31 December 2025 | Neither past due nor impaired \$'000 | Past due but not impaired \$'000 | Gross value of impaired assets \$'000 | Impairment allowance \$'000 | Total \$'000 |

2 Risk management continued

The table below sets out the age analysis of financial assets that are past due but not impaired at the balance sheet date:

| Past due but not impaired assets | 0 - 3 months past due | 3 - 6 months past due | 6 - 12 months past due | Greater than 1 year past due | Total |
|----------------------------------------------------|-----------------------|-----------------------|------------------------|------------------------------|---------------|
| 31 December 2025 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 |
| Debtors arising out of direct insurance operations | 13,589 | 5,501 | 2,154 | 1,735 | 22,979 |
| Debtors arising out of reinsurance operations | — | 645 | 910 | 5,560 | 7,115 |
| Total | 13,589 | 6,146 | 3,064 | 7,295 | 30,094 |

| Past due but not impaired assets | 0 - 3 months past due | 3 - 6 months past due | 6 - 12 months past due | Greater than 1 year past due | Total |
|----------------------------------------------------|-----------------------|-----------------------|------------------------|------------------------------|---------------|
| 31 December 2024 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 |
| Debtors arising out of direct insurance operations | 20,068 | 3,820 | 3,807 | 1,842 | 29,537 |
| Debtors arising out of reinsurance operations | — | 6,386 | 1,473 | 4,305 | 12,164 |
| Total | 20,068 | 10,206 | 5,280 | 6,147 | 41,701 |

2.4 Liquidity risk

Liquidity risk arises where cash may not be available to pay obligations when due at a reasonable cost. The syndicate is exposed to daily calls on its available cash resources, principally from claims arising from its insurance business. In the majority of the cases, these claims are settled from the premiums received.

The managing agent's approach is to manage its liquidity position so that it can reasonably survive a significant individual or market loss event. This means that the syndicate maintains sufficient liquid assets, or assets that can be translated into liquid assets at short notice and without any significant capital loss, to meet expected cash flow requirements. These liquid funds are regularly monitored using cash flow forecasting to ensure that surplus funds are invested to achieve a higher rate of return.

The maturity analysis presented in the table below shows the remaining contractual maturities for the syndicate's insurance contracts and financial instrument liabilities. For insurance and reinsurance contracts, the contractual maturity is the estimated date when the gross undiscounted contractually required cash flows will occur. For financial liabilities, it is the earliest date on which the gross undiscounted cash flows (including contractual interest payments) could be paid assuming conditions are consistent with those at the reporting date.

| Undiscounted net cash flows | No maturity stated | 0-1 yrs | 1-3 yrs | 3-5 yrs | >5yrs | Total |
|-----------------------------|--------------------|----------------|----------------|----------------|----------------|------------------|
| 31 December 2025 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 |

2.5 Capital management

Capital framework at Lloyd's

The Society of Lloyd's is a regulated undertaking and subject to the supervision of the Prudential Regulation Authority under the Financial Services and Markets Act 2000.

Within this supervisory framework, Lloyd's applies capital requirements at member level and centrally to ensure that Lloyd's complies with Solvency II, and beyond that to meet its own financial strength, license and ratings objectives. Although, as described below, the Lloyd's capital setting processes use a capital requirement set at syndicate level as a starting point, the requirement to meet Solvency II and Lloyd's capital requirements apply at an overall and member level respectively, not at a syndicate level. Accordingly the capital requirement in respect of Syndicate 623 is not disclosed in these financial statements.

Lloyd's capital setting process

In order to meet Lloyd's requirements, each syndicate is required to calculate its Solvency Capital Requirement (SCR) for the prospective underwriting year. This amount must be sufficient to cover a 1 in 200 year loss, reflecting uncertainty in the ultimate run-off of underwriting liabilities (SCR to ultimate). The syndicate must also calculate its SCR at the same confidence level but reflecting uncertainty over a one year time horizon (one year SCR) for Lloyd's to use in meeting Solvency II requirements. The SCRs of each syndicate are subject to review by Lloyd's and approval by the Lloyd's Capital and Planning Group.

A syndicate comprises one or more underwriting members of Lloyd's. Each member is liable for its own share of underwriting liabilities on the syndicate(s) on which it participates but not other members' shares. Accordingly, the capital requirement that Lloyd's sets for each member operates on a similar basis. Each member's SCR shall thus be determined by the sum of the member's share of the syndicate SCR 'to ultimate'. Where a member participates on more than one syndicate, a credit for diversification is provided to reflect the spread of risk, but consistent with determining an SCR which reflects the capital requirement to cover a 1 in 200 year loss 'to ultimate' for that member. Over and above this, Lloyd's applies a capital uplift to the member's capital requirement, known as the Economic Capital Assessment ('ECA'). The purpose of this uplift, which is a Lloyd's not a solvency II requirement, is to meet Lloyd's financial strength, license and ratings objectives. The capital uplift applied for 2025 was 35% (2024: 35%) of the member's SCR to ultimate.

Provision of capital by members

Each member may provide capital to meet its ECA either by assets held in trust by Lloyd's specifically for that member (funds at Lloyd's), held within and managed within a syndicate (funds in syndicate) and/or as the member's share of the Solvency II members' balances on each syndicate on which it participates.

Notes to the Syndicate annual accounts continued

3 Analysis of underwriting result

Underwriting result is the balance on the technical result - general business, less the allocated investment return transferred from the non-technical account.

| | Gross premiums written \$'000 | Gross premiums earned \$'000 | Gross claims incurred \$'000 | Gross operating expenses \$'000 | Reinsurance balance \$'000 | Underwriting result \$'000 |
|-----------------------------------|----------------------------------|---------------------------------|---------------------------------|------------------------------------|-------------------------------|-------------------------------|
| 2025 | | | | | | |
| Direct Insurance | | | | | | |
| Marine, aviation and transport | 117,721 | 115,108 | (85,977) | (47,528) | 18,674 | 277 |
| Fire and other damage to property | 250,297 | 245,380 | (86,808) | (92,086) | (16,949) | 49,537 |
| Third party liability | 382,204 | 398,936 | (230,709) | (149,696) | (17,505) | 1,026 |

*Certain balances which were previously classified within gross operating expenses have now been classified within reinsurance balance. The prior period comparative has been restated accordingly.

3 Analysis of underwriting result continued

The gross premiums written for direct insurance by location (where the contracts were concluded) is presented in the table below:

| | 2025 \$'000 | 2024 \$'000 |
|-------------------------------------|----------------|----------------|
| United Kingdom | 792,849 | 805,922 |
| Total gross premiums written | 792,849 | 805,922 |

4 Net operating expenses

| | 2025 \$'000 | 2024* \$'000 |
|-------------------------------------------------|----------------|-----------------|
| Acquisition costs | 256,806 | 255,694 |
| Change in deferred acquisition costs | (5,615) | (4,902) |
| Administrative expenses | 124,261 | 136,252 |
| Members' standard personal expenses | 14,049 | 10,459 |
| Reinsurance commission and profit participation | (11,929) | (16,570) |
| Net operating expenses | 377,572 | 380,933 |

*Certain balances which were previously classified within Administrative expenses have now been classified within Member's standard personal expenses. The prior period comparative has been restated accordingly.

Included within administrative expenses are profit commissions payable to the managing agent of \$25,230k (2024: \$27,703k).

Total commissions for direct insurance business for the year amounted to:

| | 2025 \$'000 | 2024 \$'000 |
|-------------------------------------------------------|----------------|----------------|
| Total commission for direct insurance business | 191,080 | 196,502 |

Administrative expenses include:

| | 2025 \$'000 | 2024 \$'000 |
|---------------------------------------------------------------------------------------------------------------------------------------|----------------|----------------|
| Fees payable to the syndicate's auditor for the audit of these syndicate annual accounts | 635 | 816 |
| Fees payable to the syndicate's auditor and its associates in respect of other services pursuant to legislation' to align with Lloyds | 180 | 355 |
| Total | 815 | 1,171 |

Fees payable to the syndicate's auditor in relation to other services pursuant to legislation primarily relate to the review and audit of syndicate regulatory returns along with the statement of actuarial opinion.

5 Key management personnel compensation

The Directors of BFL received the following aggregate remuneration charged to Syndicate 623 and included within net operating expenses:

| | 2025 \$'000 | 2024 \$'000 |
|------------------------------|----------------|----------------|
| Directors' emoluments | 1,869 | 2,615 |

The active underwriter received the following aggregate remuneration charged to Syndicate 623:

| | 2025 \$'000 | 2024 \$'000 |
|-------------------|----------------|----------------|
| Emoluments | 254 | 1,095 |

Notes to the Syndicate annual accounts continued

6 Staff numbers and costs

The syndicate has no employees. All staff are employed by Beazley Management Limited ('BML'), a related company to the managing agent, both of which operate within the Beazley Group. The average number of persons employed by BML analysed by category was as follows:

| | Number of employees | |
|----------------------------|---------------------|--------------|
| | 2025 | 2024 |
| Administration and finance | 838 | 870 |
| Underwriting | 250 | 239 |
| Claims | 94 | 88 |
| Investments | 10 | 8 |
| Total | 1,192 | 1,205 |

The following amounts were recharged by BML to the syndicate in respect of payroll costs:

| | 2025 | 2024 |
|---------------------|---------------|---------------|
| | \$'000 | \$'000 |
| Wages and salaries | 33,031 | 32,467 |
| Social security | 8,163 | 11,832 |
| Other pension costs | 6,146 | 9,750 |
| Other | 21,466 | 31,256 |
| Total | 68,806 | 85,305 |

7 Investment return

| | 2025 | 2024 |
|------------------------------------------------------------------------------|---------------|---------------|
| | \$'000 | \$'000 |
| Interest and similar income | | |
| <i>From financial assets designated at fair value through profit or loss</i> | | |
| Interest and similar income | 43,820 | 39,473 |
| <i>From financial assets classified at amortised cost</i> | | |
| Interest on cash at bank | 1,825 | 1,799 |
| Other income from investments | | |
| <i>From financial assets designated at fair value through profit or loss</i> | | |
| Gains on the realisation of investments | 34,114 | 20,152 |
| Losses on the realisation of investments | (9,694) | (4,841) |
| Unrealised gains on investments | 42,458 | 46,355 |
| Unrealised losses on the investments | (33,988) | (29,794) |
| Investment management expenses | (1,760) | (1,605) |
| Total investment return | 76,775 | 71,539 |
| Transferred to the technical account from the non-technical account | 76,775 | 71,539 |

8 Distribution and open years of account

A distribution of \$158,032K to members will be proposed in relation to the closing year of account 2023 (2024: distribution of \$106,544K for year of account 2022).

9 Financial investments

| | Carrying value | | Cost | |
|---------------------------------------------------------------------|------------------|------------------|------------------|------------------|
| | 2025 \$'000 | 2024 \$'000 | 2025 \$'000 | 2024 \$'000 |
| Shares and other variable yield securities and units in unit trusts | 278,013 | 242,717 | 244,953 | 215,749 |
| Debt securities and other fixed income securities | 1,034,083 | 1,033,543 | 1,017,722 | 1,024,197 |
| Participation in investment pools | 13,234 | 13,349 | 13,234 | 13,240 |
| Loans and deposits with credit institutions | 6,556 | — | 6,556 | — |
| Derivative assets | 45 | 1,955 | — | — |
| Syndicate loans to central fund | — | 5,864 | — | 5,757 |
| Other investments | 70,652 | 67,440 | 70,654 | 67,112 |
| Total financial investments | 1,402,583 | 1,364,868 | 1,353,119 | 1,326,055 |

Included in the carrying values above are listed investments as follows:

| | 2025 \$'000 | 2024 \$'000 |
|--------------------|----------------|----------------|
| Listed investments | 1,098,625 | 1,073,226 |

The table below presents an analysis of financial investments by their measurement classification:

| | 2025 \$'000 | 2024 \$'000 |
|----------------------------------------------------------------|------------------|------------------|
| Financial assets measured at fair value through profit or loss | 1,402,583 | 1,364,868 |
| Total financial investments | 1,402,583 | 1,364,868 |

A breakdown of derivative financial instruments is disclosed in Note 10 on page 45.

Valuation hierarchy

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy described as follows, based on the lowest level input that is significant to the fair value measurement as a whole. If the inputs used to measure the fair value of an asset or a liability could be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Level 1 – Valuations based on quoted prices in active markets for identical instruments. An active market is a market in which transactions for the instrument occur with sufficient frequency and volume on an ongoing basis such that quoted prices reflect prices at which an orderly transaction would take place between market participants at the measurement date.

Level 2 – Valuations based on quoted prices in markets that are not active, or based on pricing models for which significant inputs can be corroborated by observable market data, directly or indirectly (e.g. interest rates, exchange rates). Level 2 inputs include:

- Quoted prices similar assets and liabilities in active markets;
- Quoted prices for identical or similar assets and liabilities in markets that are not active, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly;
- Inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, implied volatilities and credit spreads); and
- Market corroborated inputs. Included within level 2 are government bonds and treasury bills, equity funds and corporate bonds which are not actively traded, hedge funds and senior secured loans.

Level 3 – Valuations based on inputs that are unobservable or for which there is limited market activity against which to measure fair value. The availability of financial data can vary for different financial assets and is affected by a wide variety of factors, including the type of financial instrument, whether it is new and not yet established in the marketplace, and other characteristics specific to each transaction. To the extent that valuation is based on models or inputs that are unobservable in the market, the determination of fair value requires more judgement. Accordingly the degree of judgement exercised by management in determining fair value is greatest for instruments classified in level 3. The managing agent uses prices and inputs that are current as of the measurement date for valuation of these instruments.

Notes to the Syndicate annual accounts continued

9 Financial investments continued

Valuation approach

The valuation approach for fair value assets and liabilities classified as level 2 is as follows:

(a) For the Syndicate's level 2 government-issued bonds and corporate bonds included within 'Debt securities and other fixed income investments', prices are derived from Bloomberg. On a monthly basis, these are validated against both internal sources and prices provided by our administrator.

(b) For the Syndicate's level 2 collateralised loan obligations included within 'Debt securities and other fixed income investments', our fund administrator provides daily pricing derived from a market-accepted theoretical model using data sourced from Bloomberg/Reuters as inputs. On a monthly basis, prices from our administrator are validated against those provided by our custodians. These are also checked internally for consistency.

(c) For our hedge funds which are included within 'Shares and other variable yield securities and units in unit trusts', the pricing and valuation of each fund is undertaken by administrators in accordance with each underlying fund's valuation policy. Individual fund prices are communicated by the administrators to all investors via the monthly investor statements. The fair value of the hedge fund portfolios are calculated by reference to the underlying net asset values of each of the individual funds.

The table below shows the fair values of financial instruments at 31 December 2025 and 31 December 2024, including their levels in the fair value hierarchy:

| | Level 1 | Level 2 | Level 3 | Assets held at amortised cost | Total |
|---------------------------------------------------------------------|----------------|----------------|-----------|-------------------------------------|------------------|
| 2025 | \$'000 | \$'000 | \$'000 | \$'000 | \$'000 |
| Shares and other variable yield securities and units in unit trusts | 150,943 | 127,011 | 59 | — | 278,013 |
| Debt securities and other fixed income securities | 497,227 | 536,856 | — | — | 1,034,083 |

| Total financial investments | 744,597 | 604,073 | 16,198 | — | 1,364,868 |
| Derivative financial liabilities | (3,314) | — | — | — | (3,314) |
| Total | 741,283 | 604,073 | 16,198 | — | 1,361,554 |

Additional information is obtained from fund managers relating to the underlying assets within individual hedge funds. The syndicate identified that 79% (2024: 80%) of these underlying assets were level 1, with the remainder classified as level 2. If the inputs used to measure the fair value of an asset or a liability could be categorised in different levels of fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. This enabled us to categorise hedge funds as level 2.

10 Derivative financial instruments

In 2025 and 2024, the syndicate entered into over-the-counter and exchange traded derivative contracts in order to economically hedge the foreign currency exposure resulting from transactions and balances held in currencies that are different to the functional currency of the syndicate. The syndicate had the right and intention to settle each contract on a net basis.

15 Technical Provisions continued

The following tables illustrate the development of the estimates of earned ultimate cumulative claims incurred, including claims notified and IBNR, for each successive underwriting year, illustrating how amounts estimated have changed from the first estimates made. The below tables were previously shown on a fully earned basis. This is the first year presenting these tables on an earned basis. As these tables are on an underwriting year basis, there is an apparent large increase from amounts reported for the end of the underwriting year to one year later as a large proportion of premiums are earned in the year of account's second year of development.

Gross:

21 Related parties transactions

Beazley Furlonge Limited ('BFL'), the managing agent of Syndicate 623, is a wholly-owned subsidiary of Beazley plc. The Directors of BFL who have participated in Syndicate 623 indirectly through Beazley Staff Underwriting Limited are disclosed in the managing agent's report on page 16.

Certain Directors of BFL have shareholdings in Beazley plc which provides capacity for Syndicates 2623, 3622, 3623, 4321 and 5623. Syndicate 623 writes in parallel with Syndicate 2623.

Beazley plc has the following service companies ('managing general agents'), which underwrite on behalf of Syndicates 623 and 2623 (the 'syndicates') and write business either directly for the syndicates or via Lloyd's Brussels:

- Beazley Solutions International Limited – (Europe);
- Beazley Pte Limited – (Singapore); and
- Beazley Labuan Limited – (Malaysia).

The syndicates are charged commissions for the type of business underwritten by these companies. The commission is based on the costs incurred by these service companies in generating and servicing the business on behalf of the syndicates. As Beazley plc owns 100% of the share capital, it could receive profits from these entities in the future from the business underwritten by the names on Syndicate 623.

The syndicate is charged fees from BFL in respect of management services provided. Both Beazley Management Limited and BFL, the managing agent of the syndicate, are ultimately controlled by Beazley plc.

From 2010 to 2023, Syndicate 623, alongside Syndicate 2623, ceded part of its property treaty book to Syndicate 6107 at Lloyd's, and since 2017 till present has also ceded part of its cyber business to Syndicate 6107. Syndicate 6107 is managed by BFL and commissions are received by the syndicate in respect of these transactions.

The intercompany positions with other syndicates managed by BFL at 31 December 2025 are disclosed above in note 13 and note 18.

The syndicate, alongside Syndicate 2623, has written intra-group quota-share reinsurance contract with Bldac which inceptioned 1 January 2024. The contract reinsures business from Syndicate 623 and 2623 to Bldac.

The total amount due to Bldac at 2025 year end was \$2,809k (2024: \$3,420k). Outward reinsurance premiums of \$28,625k (2024: \$26,066k) and reinsurers share of claims paid of \$10,313k (2024: \$1,628k) were recognised in the year.

Beazley has a 25% equity interest in Falcon Money Management Holdings Limited ('Falcon'), an investment management company. Syndicate 623 invests in certain funds managed by Falcon, as part of which management fees are deducted.

Profit related remuneration for Syndicate 623's underwriting staff is charged to the syndicate. At the balance sheet date, the syndicate has amounts due to the managing agent of \$36,562k (2024: \$21,709k). In addition to this amount, the syndicate has a profit commission payable to the managing agent of \$48,368k (2024: \$68,341k). The managing agent recharged expenses and fees of \$144,717k (2024: \$159,252k) to the syndicate in the current year.

Notes to the Syndicate annual accounts continued

21 Related parties transactions continued

BFL as the managing agent of the syndicate is responsible for settling intercompany balances with other managed syndicates and net amounts due to/from other related entities.

22 Subsequent events

The 2023 YoA has closed with a profit of \$158,032k. It is the intention that these funds will be distributed to the members reserve funds in May 2026.

23 Foreign exchange rates

The syndicate used the following exchange rates to translate foreign currency assets, liabilities, income and expenses into US dollars, being the syndicate's presentational currency:

| | 2025 | | | 2024 | | |
|-------------------|-----------------|---------------|--------------|-----------------|---------------|--------------|
| | Start of period | End of period | Average rate | Start of period | End of period | Average rate |
| Sterling | 0.78 | 0.74 | 0.76 | 0.80 | 0.78 | 0.78 |
| Euro | 0.95 | 0.85 | 0.89 | 0.93 | 0.95 | 0.92 |
| US dollar | 1.00 | 1.00 | 1.00 | 1.00 | 1.00 | 1.00 |
| Canadian dollar | 1.41 | 1.37 | 1.40 | 1.36 | 1.41 | 1.36 |
| Australian dollar | 1.57 | 1.50 | 1.55 | 1.52 | 1.57 | 1.51 |

24 Funds at Lloyd's

Every member is required to hold capital at Lloyd's which is held in trust and known as Funds at Lloyd's ('FAL'). These funds are intended primarily to cover circumstances where syndicate assets prove insufficient to meet participating members' underwriting liabilities. The level of FAL that Lloyd's requires a member to maintain is determined by Lloyd's based on Prudential Regulatory Authority requirements and resource criteria. The determination of FAL has regard to a number of factors including the nature and amount of risk to be underwritten by the member and the assessment of the reserving risk in respect of business that has been underwritten. Since FAL is not under the management of the managing agent, no amount has been shown in these Financial Statements by way of such capital resources. However, the managing agent is able to make a call on the Member's FAL to meet liquidity requirements or to settle losses.

Managing agent's report

The syndicate underwriting year accounts have been prepared under the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 (the 'Lloyd's Regulations') and in accordance with the Syndicate Accounting Byelaw (No.9 of 2005), including Financial Reporting Standard 102 (FRS 102) and 103 Insurance Contracts (FRS 103) in accordance with the provisions of Schedule 3 of the Large and Medium-size Companies and Groups (Accounts and Reports) Regulations relating to insurance companies.

Members participate on a syndicate by reference to a year of account ('YoA') and each syndicate YoA is a separate annual venture. These accounts relate to the 2023 YoA which has been closed by reinsurance to close at 31 December 2025; consequently the balance sheet represents the assets and liabilities of the 2023 YoA and the profit or loss account reflects the transactions for that YoA during the 36 months period until closure. The 2023 YoA closed with a profit of \$158.0m which includes a reinsurance to close deficit from the 2022 YoA of \$14.1m (note 6). The profit on the 2023 YoA represents a return on capacity of 14.4% and includes the impact of personal members expenses of \$4.9m. Return on capacity excluding these expenses would be 14.8%.

Principal activity

The principal activity of Syndicate 623 is the transaction of a range of specialised insurance business at Lloyd's, including the underwriting of professional indemnity, cyber liability, property, marine, reinsurance, accident and life, and political risks and contingency business.

Directors

A list of Directors of the managing agent who held office during the current year can be found on page 68 of the syndicate annual accounts.

Disclosure of information to the auditor

The Directors of the managing agent who held office at the date of approval of this managing agent's report confirm that, so far as they are each aware, there is no relevant audit information of which the syndicate's auditors are unaware; and each Director has taken all the steps that they ought to have taken as a Director to make themselves aware of any relevant audit information and to establish that the syndicate's auditors are aware of that information.

On behalf of the Board

C C J Wong

Director

19 February 2026

Statement of managing agent's responsibilities

The Directors of the managing agent are responsible for preparing the syndicate underwriting year accounts in accordance with the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 and the Lloyd's Syndicate Accounting Byelaw. They have elected to prepare the accounts in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland.

Under Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008, the Directors of the managing agent must not approve the underwriting year accounts unless they are satisfied that they give a true and fair view of the result of the underwriting year at closure. In preparing these accounts, the Directors of the managing agent are required to:

- select suitable accounting policies and then apply them consistently and where there are items which affect more than one YoA, ensure a treatment which is equitable between the members of the syndicate affected is used;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the accounts;
- assess the syndicate's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to cease trading, or have no realistic alternative but to do so. As explained in note 1 the Directors of the managing agent have not prepared the underwriting year accounts on a going concern basis.

The Directors of the managing agent are responsible for keeping adequate and proper accounting records that are sufficient to show and explain the syndicate's transactions and disclose with reasonable accuracy at any time the financial position of the syndicate and enable them to ensure that the underwriting year accounts comply with the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008. They are responsible for such internal control as they determine is necessary to enable the preparation of accounts that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

On behalf of the Board

C C J Wong

19 February 2026

Independent auditor's report to the members of Syndicate 623 2023 closed year of account

Opinion

We have audited the syndicate underwriting year accounts for the 2023 year of account of syndicate 623 ('the syndicate') for the three years ended 31 December 2025 which comprise the Profit or loss account, the Balance sheet, the Statement of Changes In Members' Balances, the Statement of Cash Flows and the related notes 1 to 16, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and FRS 103 "Insurance Contracts" (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the syndicate underwriting year accounts:

- give a true and fair view of the profit for the 2023 closed year of account;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 and have been properly prepared in accordance with the Lloyd's Syndicate Accounting Byelaw (no. 8 of 2005).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the syndicate underwriting year accounts section of our report. We are independent of the syndicate in accordance with the ethical requirements that are relevant to our audit of the syndicate underwriting year accounts in the UK, including the FRC's Ethical Standard as applied to other entities of public interest, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter – closure of the 2023 year of account

We draw attention to the Note 1 which explains that the 2023 year of account of syndicate 623 has closed and all assets and liabilities transferred to the 2024 year of account by reinsurance to close at 31 December 2025.

As a result, the syndicate underwriting year accounts for the 2023 year of account of syndicate 623 have been prepared under basis other than going concern.

Our opinion is not modified in respect of this matter.

Other information

The other information comprises the information included in the Underwriting Year report and accounts, other than the syndicate underwriting year accounts and our auditor's report thereon. The managing agent is responsible for the other information contained within the Underwriting Year report and accounts.

Our opinion on the syndicate underwriting year accounts does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the syndicate underwriting year accounts or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the syndicate underwriting year accounts themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where The Lloyd's Syndicate Accounting Byelaw (no. 8 of 2005) requires us to report to you, if in our opinion:

- the managing agent in respect of the syndicate has not kept adequate accounting records; or
- the syndicate underwriting year accounts are not in agreement with the accounting records.

Responsibilities of the managing agent

As explained more fully in the Statement of Managing Agent's Responsibilities set out on page 53, the managing agent is responsible for the preparation of the syndicate underwriting year accounts in accordance with The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 and The Lloyd's Syndicate Accounting Byelaw (no. 8 of 2005) and for being satisfied that they give a true and fair view, and for such internal control as the managing agent determines is necessary to enable the preparation of the syndicate underwriting year accounts that are free from material misstatement, whether due to fraud or error.

In preparing the syndicate underwriting year accounts, the managing agent is responsible for assessing the syndicate's ability to realise its assets and discharge its liabilities in the normal course of business, disclosing, as applicable, any matters that impact its ability to do so.

Auditor's responsibilities for the audit of the syndicate underwriting year accounts

Our objectives are to obtain reasonable assurance about whether the syndicate underwriting year accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these syndicate underwriting year accounts.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the managing agent and management.

Our approach was as follows:

- We obtained a general understanding of the legal and regulatory frameworks that are applicable to the syndicate and determined that the most significant are direct laws and regulations related to elements of Lloyd's Byelaws and Regulations, and the financial reporting framework (UKGAAP) and requirements referred to by Lloyd's in the Instructions. Our considerations of other laws and regulations that may have a material effect on the syndicate underwriting year accounts included permissions and supervisory requirements of Lloyd's of London, the Prudential Regulation Authority ('PRA') and the Financial Conduct Authority ('FCA').
- We obtained a general understanding of how the syndicate is complying with those frameworks by making enquiries of management, internal audit, and those responsible for legal and compliance matters of the syndicate. In assessing the effectiveness of the control environment, we also reviewed significant correspondence between the syndicate, Lloyd's of London and other UK regulatory bodies; reviewed minutes of the Board and Risk Committee of the managing agent; and gained an understanding of the managing agent's approach to governance.
- For direct laws and regulations, we considered the extent of compliance with those laws and regulations as part of our procedures on the related syndicate underwriting year accounts' items.
- For both direct and other laws and regulations, our procedures involved: making enquiries of the directors of the managing agent and senior management for their awareness of any non-compliance of laws or regulations, enquiring about the policies that have been established to prevent non-compliance with laws and regulations by officers and employees, enquiring about the managing agent's methods of enforcing and monitoring compliance with such policies, and inspecting significant correspondence with Lloyd's, the FCA and the PRA.

Independent auditor's report to the members of Syndicate 623

2023 closed year of account continued

- The syndicate operates in the insurance industry which is a highly regulated environment. As such the Senior Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities, which included the use of specialists where appropriate.
- We assessed the susceptibility of the syndicate's underwriting year accounts to material misstatement, including how fraud might occur by considering the controls that the managing agent has established to address risks identified by the managing agent, or that otherwise seek to prevent, deter, or detect fraud. We also considered areas of significant judgement, complex transactions, performance targets, economic or external pressures and the impact these have on the control environment. Where this risk was considered to be higher, we performed audit procedures to address each identified fraud risk including,
 - Reviewing accounting estimates for evidence of management bias. Supported by our Actuaries we assessed if there were any indicators of management bias in the valuation of insurance liabilities and the recognition of estimated premium income.
 - Evaluating the business rationale for significant and/or unusual transactions.
- These procedures included testing manual journals and were designed to provide reasonable assurance that the syndicate underwriting year accounts were free from fraud or error.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the syndicate's members, as a body, in accordance with The Lloyd's Syndicate Accounting Byelaw (no. 8 of 2005) and The Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008. Our audit work has been undertaken so that we might state to the syndicate's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the syndicate and the syndicate's members as a body, for our audit work, for this report, or for the opinions we have formed.

Niamh Byrne (Senior statutory auditor)

Notes to the syndicate underwriting year accounts

closed at 31 December 2025

1 Accounting policies

Basis of preparation

These underwriting accounts have been prepared in accordance with the Insurance Accounts Directive (Lloyd's Syndicate and Aggregate Accounts) Regulations 2008 ('the Regulations') and applicable Accounting Standards in the United Kingdom, including Financial Reporting Standard 102 ('FRS 102') and Insurance Contracts ('FRS 103'). They have also been prepared in accordance with Lloyd's Syndicate Accounting Byelaw (N.8 of 2005) and in accordance with the provisions of Schedule 3 of the Large and Medium-size Companies and Groups (Accounts and Reports) Regulations relating to insurance companies.

Whilst the Directors of the managing agent have a reasonable expectation that the syndicate has adequate resources to continue in operational existence for the foreseeable future, these financial statements represent the participation of members in the 2023 YoA which closed on 31 December 2025. The accumulated profits of the 2023 YoA will be distributed shortly after publication of these accounts. Therefore the 2023 YoA is not continuing to trade and, accordingly, the Directors have not adopted the going concern basis in the preparation of these accounts. The amounts reported would be identical if the accounts had been prepared on a going concern basis as the 2023 YoA will be closed by payment of a reinsurance to close premium, as outlined in note (a) below, which is consistent with the normal course of business for a Lloyd's syndicate and with the approach applied to earlier underwriting years.

The principal accounting policies applied in the preparation of these underwriting accounts are set out below. The policies have been consistently applied to all periods presented, unless otherwise stated. All amounts presented are stated in US dollars, being the syndicate's functional currency, and in millions, unless noted otherwise.

Underwriting transactions

- (a) The underwriting accounts for each YoA are normally kept open for three years before the result of that year is determined. At the end of the three-year period, outstanding liabilities can normally be determined with sufficient accuracy to permit the YoA to be closed by payment of a reinsurance to close premium to the successor YoA.
- (b) Gross premiums are allocated to YoA on the basis of the inception date of the policy. Commission and brokerage are charged to the YoA to which the relevant policy is allocated. Policies written under binding authorities, lineslips or consortium arrangements are allocated to the YoA into which the arrangement incepts. Additional and return premiums follow the YoA of the original premium. Premiums in respect of reinsurance ceded are attributed to the same year as the original risk being protected. Gross premiums are stated before the deduction of brokerage, taxes and duties levied on them. Estimates are made for pipeline premiums, representing amounts due to the syndicate not yet notified.
- (c) Gross claims paid are allocated to the same YoA that to which the corresponding premiums are allocated and include internal and external claims settlement expenses. Reinsurance recoveries are allocated to the YoA to which the claim was charged.
- (d) The reinsurance to close premium is determined by reference to outstanding liabilities, including claims incurred but not yet reported, relating to the closed year and to all previous closed years reinsured therein. Although the estimate of net outstanding liabilities is considered to be fair and reasonable, it is implicit in the estimation procedure that the ultimate liabilities will be at variance from the premium so determined. The reinsurance to close premium includes a provision for unearned premiums and unexpired risks at the balance sheet date, net of deferred acquisition costs.
- (e) Please refer to note 1 Accounting policies in Syndicate 623 annual accounts for details around measurement of insurance contracts.

Comparatives

- (f) Comparatives are not provided in these syndicate underwriting year accounts as each syndicate YoA is a separate annual venture.

Investment return

- (g) Investment return comprises investment income, realised investment gains and losses and movements in unrealised gains and losses, net of investment expenses, charges and interest. Investment return arising in each calendar year is allocated to years of account in proportion to the average funds available for investment attributable to those years. Investment returns in respect of overseas deposits are allocated to the YoA which funded these deposits.

Notes to the syndicate underwriting year accounts

closed at 31 December 2025 continued

1 Accounting policies continued

- (h) The investment return is wholly allocated to the technical account.
- (i) Investments are valued at market value at the balance sheet date. Movements in unrealised gains and losses on investments represent the difference between the valuation at the balance sheet date, and the valuation at the previous period end or purchase value during the period.

Syndicate operating expenses

- (j) Acquisition costs comprise brokerage, premium levies, and staff related costs of the underwriters acquiring the business. Costs incurred by the managing agent in respect of the syndicate are charged to the syndicate. Where expenses do not relate to any specific YoA they are apportioned between YoA on a basis which reflects the benefit obtained by each YoA from each type of expense.
- (l) Where expenses are incurred jointly by the managing agent and the syndicate, they are apportioned as follows:
- salaries and related costs – according to the staff time spent on dealing with syndicate matters;
 - accommodation costs – proportioned based on the overall staff costs allocation above; and
 - other costs – as appropriate in each case.

Taxation

- (m) Under Schedule 19 of the Finance Act 1993, managing agents are not required to deduct basic rate income tax from trading income. In addition, all UK basic income tax deducted from syndicate investment income is recoverable by managing agents and consequently the distribution made to members or their members' agents is gross of tax. Capital appreciation falls within trading income and is also distributed gross of tax. It is the responsibility of members to agree and settle their individual tax liabilities with the Inland Revenue.
- (n) No provision has been made for any US federal income tax payable on the underwriting results or investment earnings. Any payments on account made by the syndicate during the year have been included in the balance sheet under the heading 'other debtors'.

No provision has been made for any other overseas tax payable by members on underwriting results. Members resident overseas for tax purposes are responsible for agreeing and settling any tax liabilities with the taxation authorities of their country of residence.

Basis of currency translation

- (o) The functional and presentational currency of the syndicate is US dollars. Non-USD denominated items going through the profit or loss account are translated to US dollars at the three years' average rates of exchange. Assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated to the functional currency at the foreign exchange rate at that date.

2 Risk management

The 2023 YoA has closed and all assets and liabilities have been transferred to a reinsuring YoA. The risks that it is exposed to in respect of the reported financial position and financial performance are significantly less than those relating to the open YoA's as disclosed in the syndicate annual accounts. Accordingly, these underwriting year accounts do not have associated risk disclosures as required by section 34 of FRS 102. Full disclosures relating to these risks are provided in the syndicate annual accounts.

3 Analysis of underwriting result

An analysis of the underwriting result before investment return is set out below:

| | Gross premiums written \$m | Gross premiums earned \$m | Gross claims incurred \$m | Net operating expenses \$m | Reinsurance balance \$m | Underwriting result \$m |
|----------------------------------------------|-------------------------------------|------------------------------------|---------------------------------|----------------------------------|-------------------------------|-------------------------------|
| Direct Insurance | | | | | | |
| Marine aviation and transport | 72.8 | 71.4 | (33.4) | (29.7) | (3.2) | 5.1 |
| Fire and other damage to property | 248.1 | 241.3 | (83.7) | (82.1) | (30.1) | 45.4 |
| Third party liability | 471.3 | 434.9 | (269.3) | (148.1) | (34.6) | (17.1) |
| Miscellaneous | 30.8 | 26.0 | (14.4) | (12.9) | (2.0) | (3.3) |
| Total Direct Insurance | 823.0 | 773.6 | (400.8) | (272.8) | (69.9) | 30.1 |
| Reinsurance accepted | 162.1 | 163.1 | (66.1) | (68.2) | 16.1 | 44.9 |
| Total Direct and Reinsurance accepted | 985.1 | 936.7 | (466.9) | (341.0) | (53.8) | 75.0 |

Development on the 2022 year of account and prior have been included as reinsurance accepted. This can lead to unexpected movements on the gross premium earned, gross claims incurred, and reinsurance balance columns. All business was concluded in the UK.

4 Reinsurance to close premiums received

| | 2023 year of account \$m |

| Profit/(loss) after illustrative profit commission and personal expenses (£) | 1.4 | 1.4 | 1.6 | (0.2) | 0.3 | (0.3) | (0.2) |

Notes:

- 1 The illustrative profit commission and personal expenses are estimates of amounts which might be charged on an illustrative share of £10,000. The agency agreements for 1991 and subsequent years of account only provide for the deduction of fees and profit commission on behalf of the managing agent.
- 2 The effect of any minimum charges on personal expenses or deficit clauses on profit commission have been ignored.
- 3 Internal claims settlement expenses have been included in 'net claims'.
- 4 The above figures are stated before members' agents' fees.
- 5 Profit after illustrative profit commission and personal expenses is shown in dollars and converted to sterling at the closing rate.
- 6 Gross and net premium amounts shown above are net of brokerage expenses.
- 7 The summary of closed years results are on a 'pure year' basis.
